Platform Overview

“Bedaya is a unified educational platform designed to simplify learning for students, enable teachers to manage courses efficiently, and empower administrators with full control.”

The Challenge: A Disconnected E-Learning Experience

Lack of organized learning tools

No unified dashboards for different user roles

Difficulty tracking student progress effectively

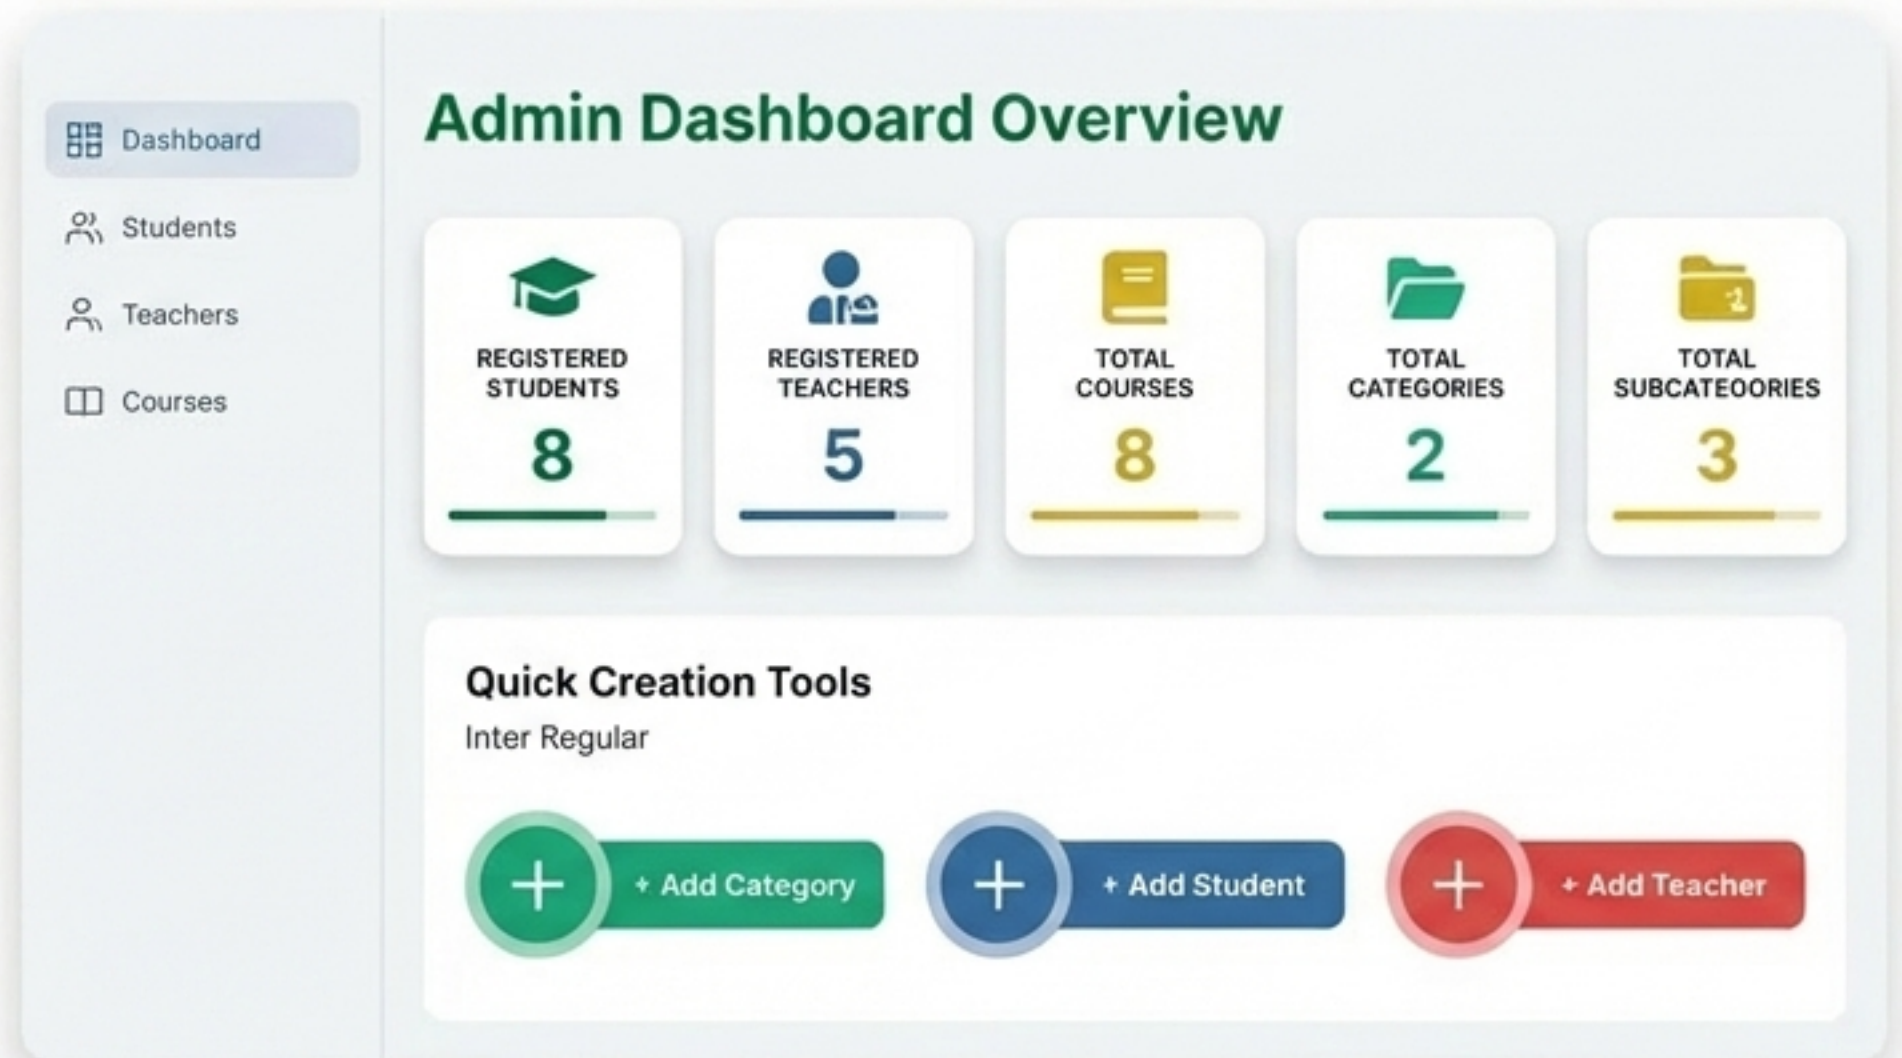

No integrated management for subscriptions or content categories

Teachers and students struggle with fragmented communication

The Solution: A Unified and Scalable Platform

“A complete e-learning system offering dashboards for each role, course publishing, subscription management, assessments, and analytics—all built on a clean **N-Tier Architecture** to ensure **scalability**, **maintainability**, and **testability**.”

Core Platform Features
