The Challenge: A Disconnected Learning Ecosystem

Disorganized Learning Tools

Students and teachers lack a central hub for course materials and communication.

Lack of Unified Dashboards

No single point of view for users to manage their distinct roles and responsibilities.

Difficult Progress Tracking

Instructors struggle to monitor student performance and engagement effectively.

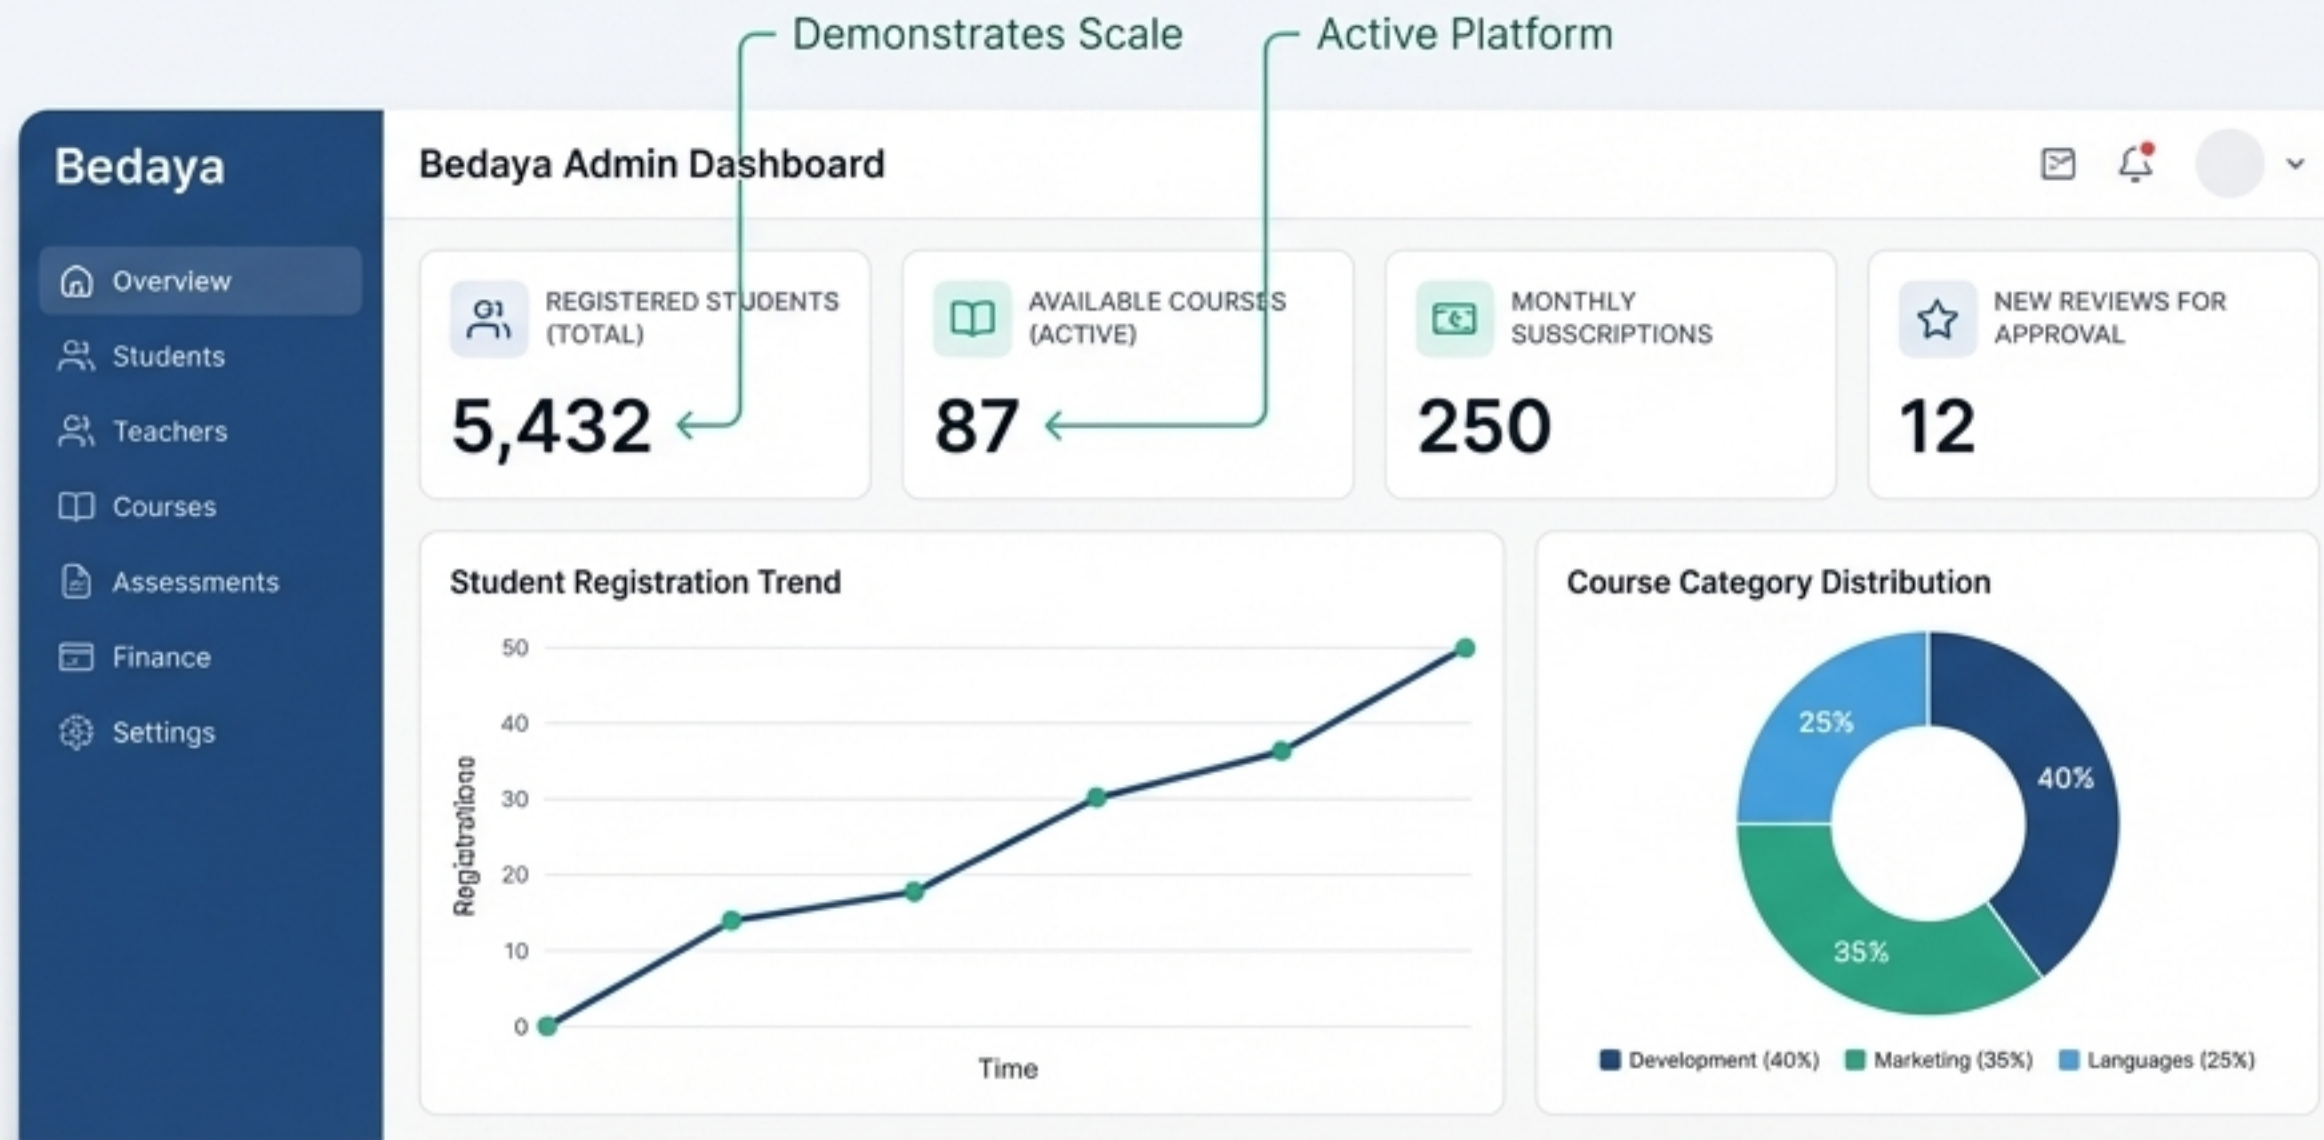

Complex Content & Financial Management

Administrators lack streamlined tools for managing course catalogs and subscriptions.

The Solution: A Unified Platform Engineered for Clarity and Control

Bedaya is a role-based e-learning system built on a scalable N-Tier architecture. It provides dedicated dashboards for students, teachers, and administrators to manage the entire educational lifecycle—from course creation and enrollment to assessment and financial oversight.

The Bedaya Experience: A Tailored Interface for Every Role

The Administrator

Full command over platform health, user management, content catalogs, and financial performance.

The Teacher

Empowered to create engaging courses, manage students, and track their educational impact.

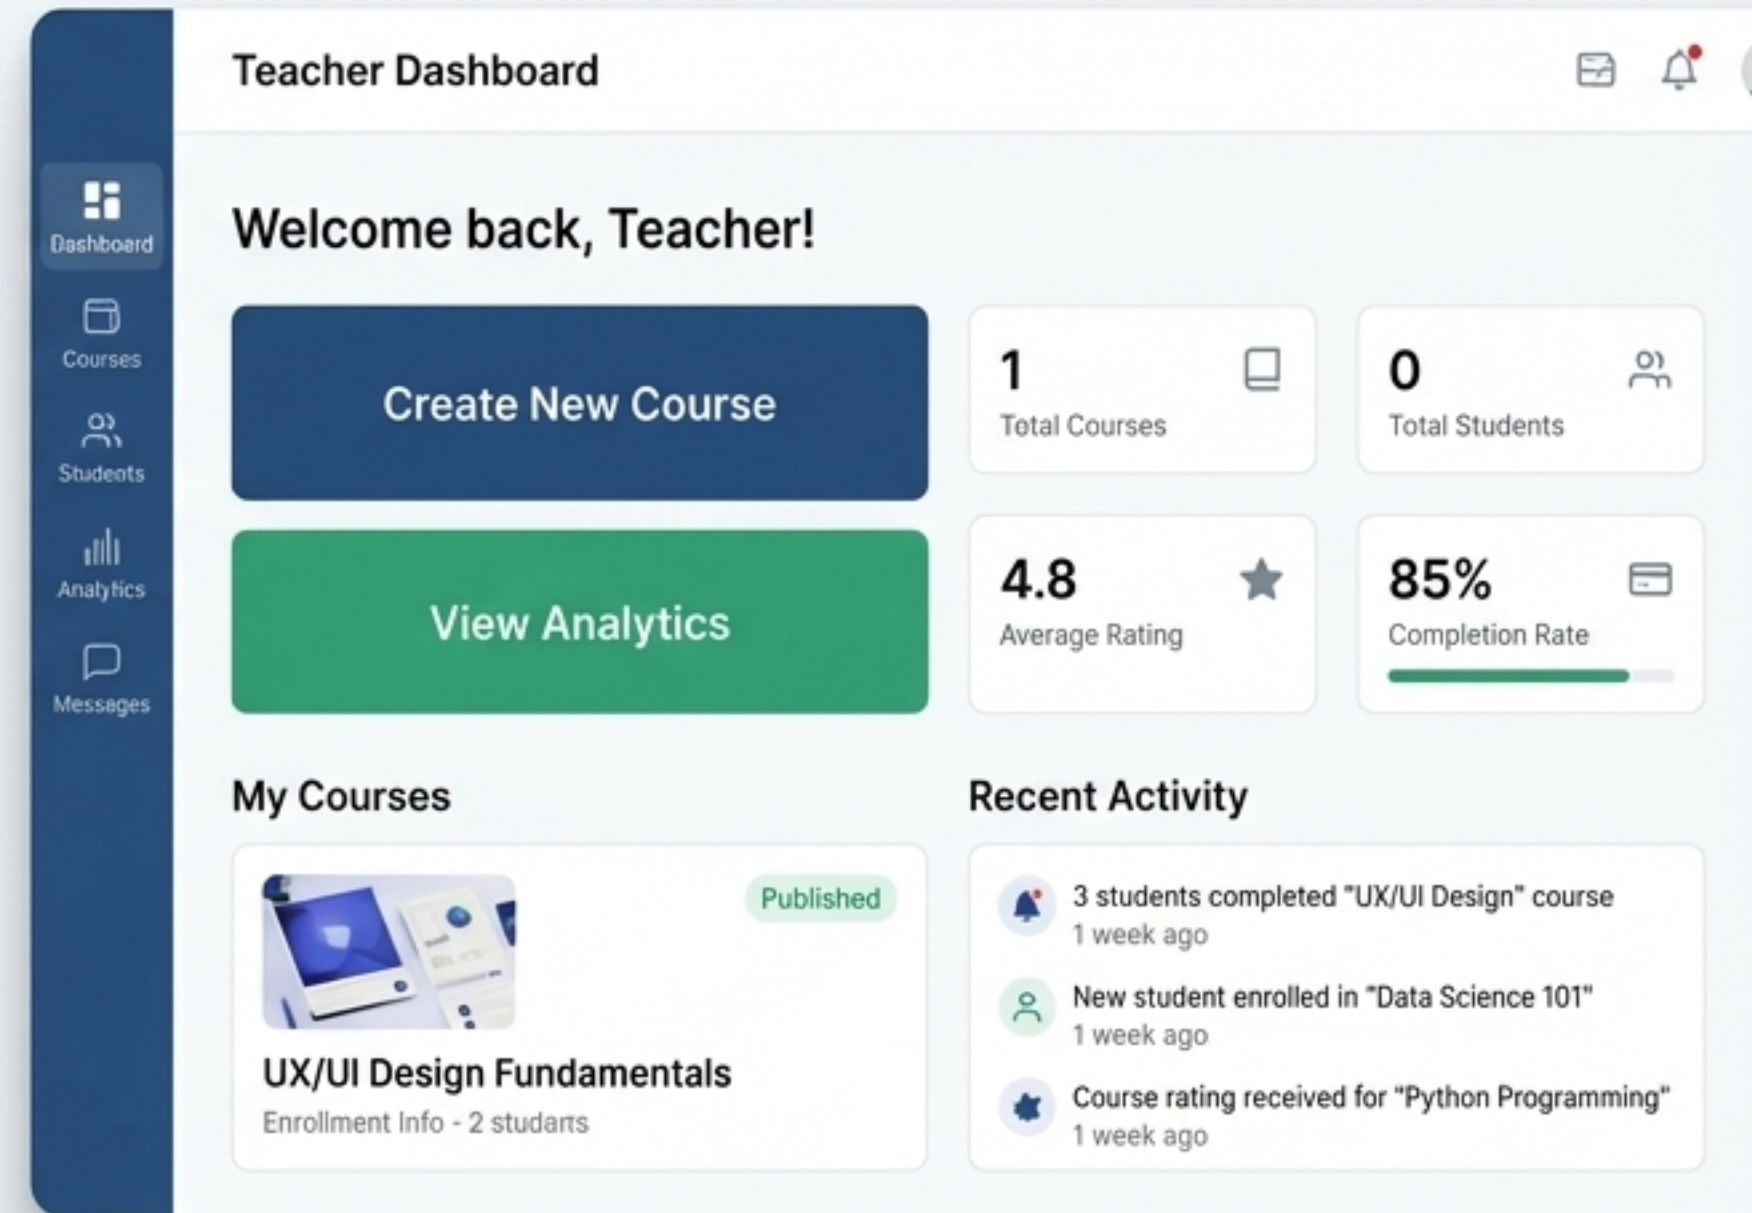

The Student

A seamless and intuitive journey to discover courses, learn new skills, and monitor personal progress.

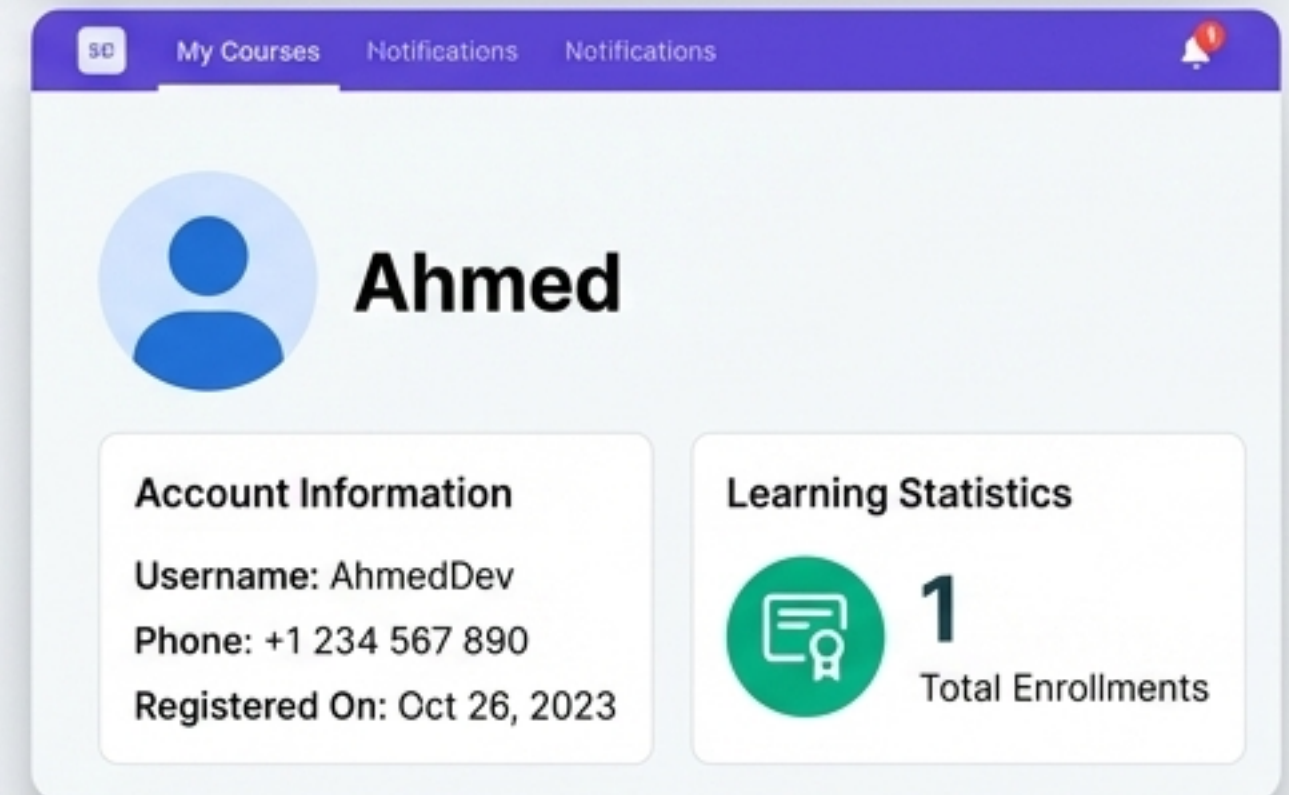

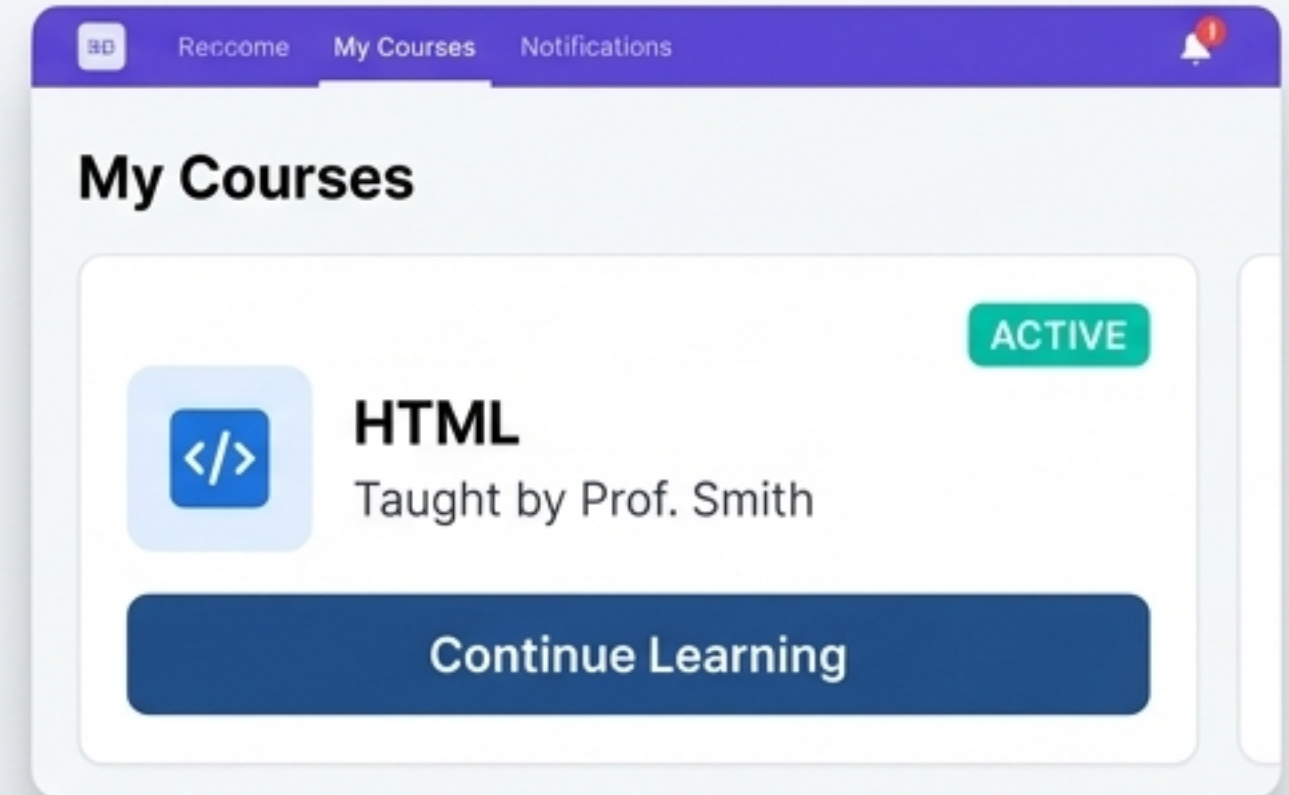

The Teacher: Tools to Create, Manage, and Inspire

- ✓ **Intuitive Course Creation:** Build and publish comprehensive courses with lessons, materials, and assessments.
- ✓ **Student Progress Tracking:** Monitor enrollment numbers, completion rates, and individual student performance.
- ✓ **Performance Analytics:** Gain insights into course ratings and engagement to refine teaching impact.
- ✓ **Direct Student Communication:** Engage with learners through an integrated messaging system.

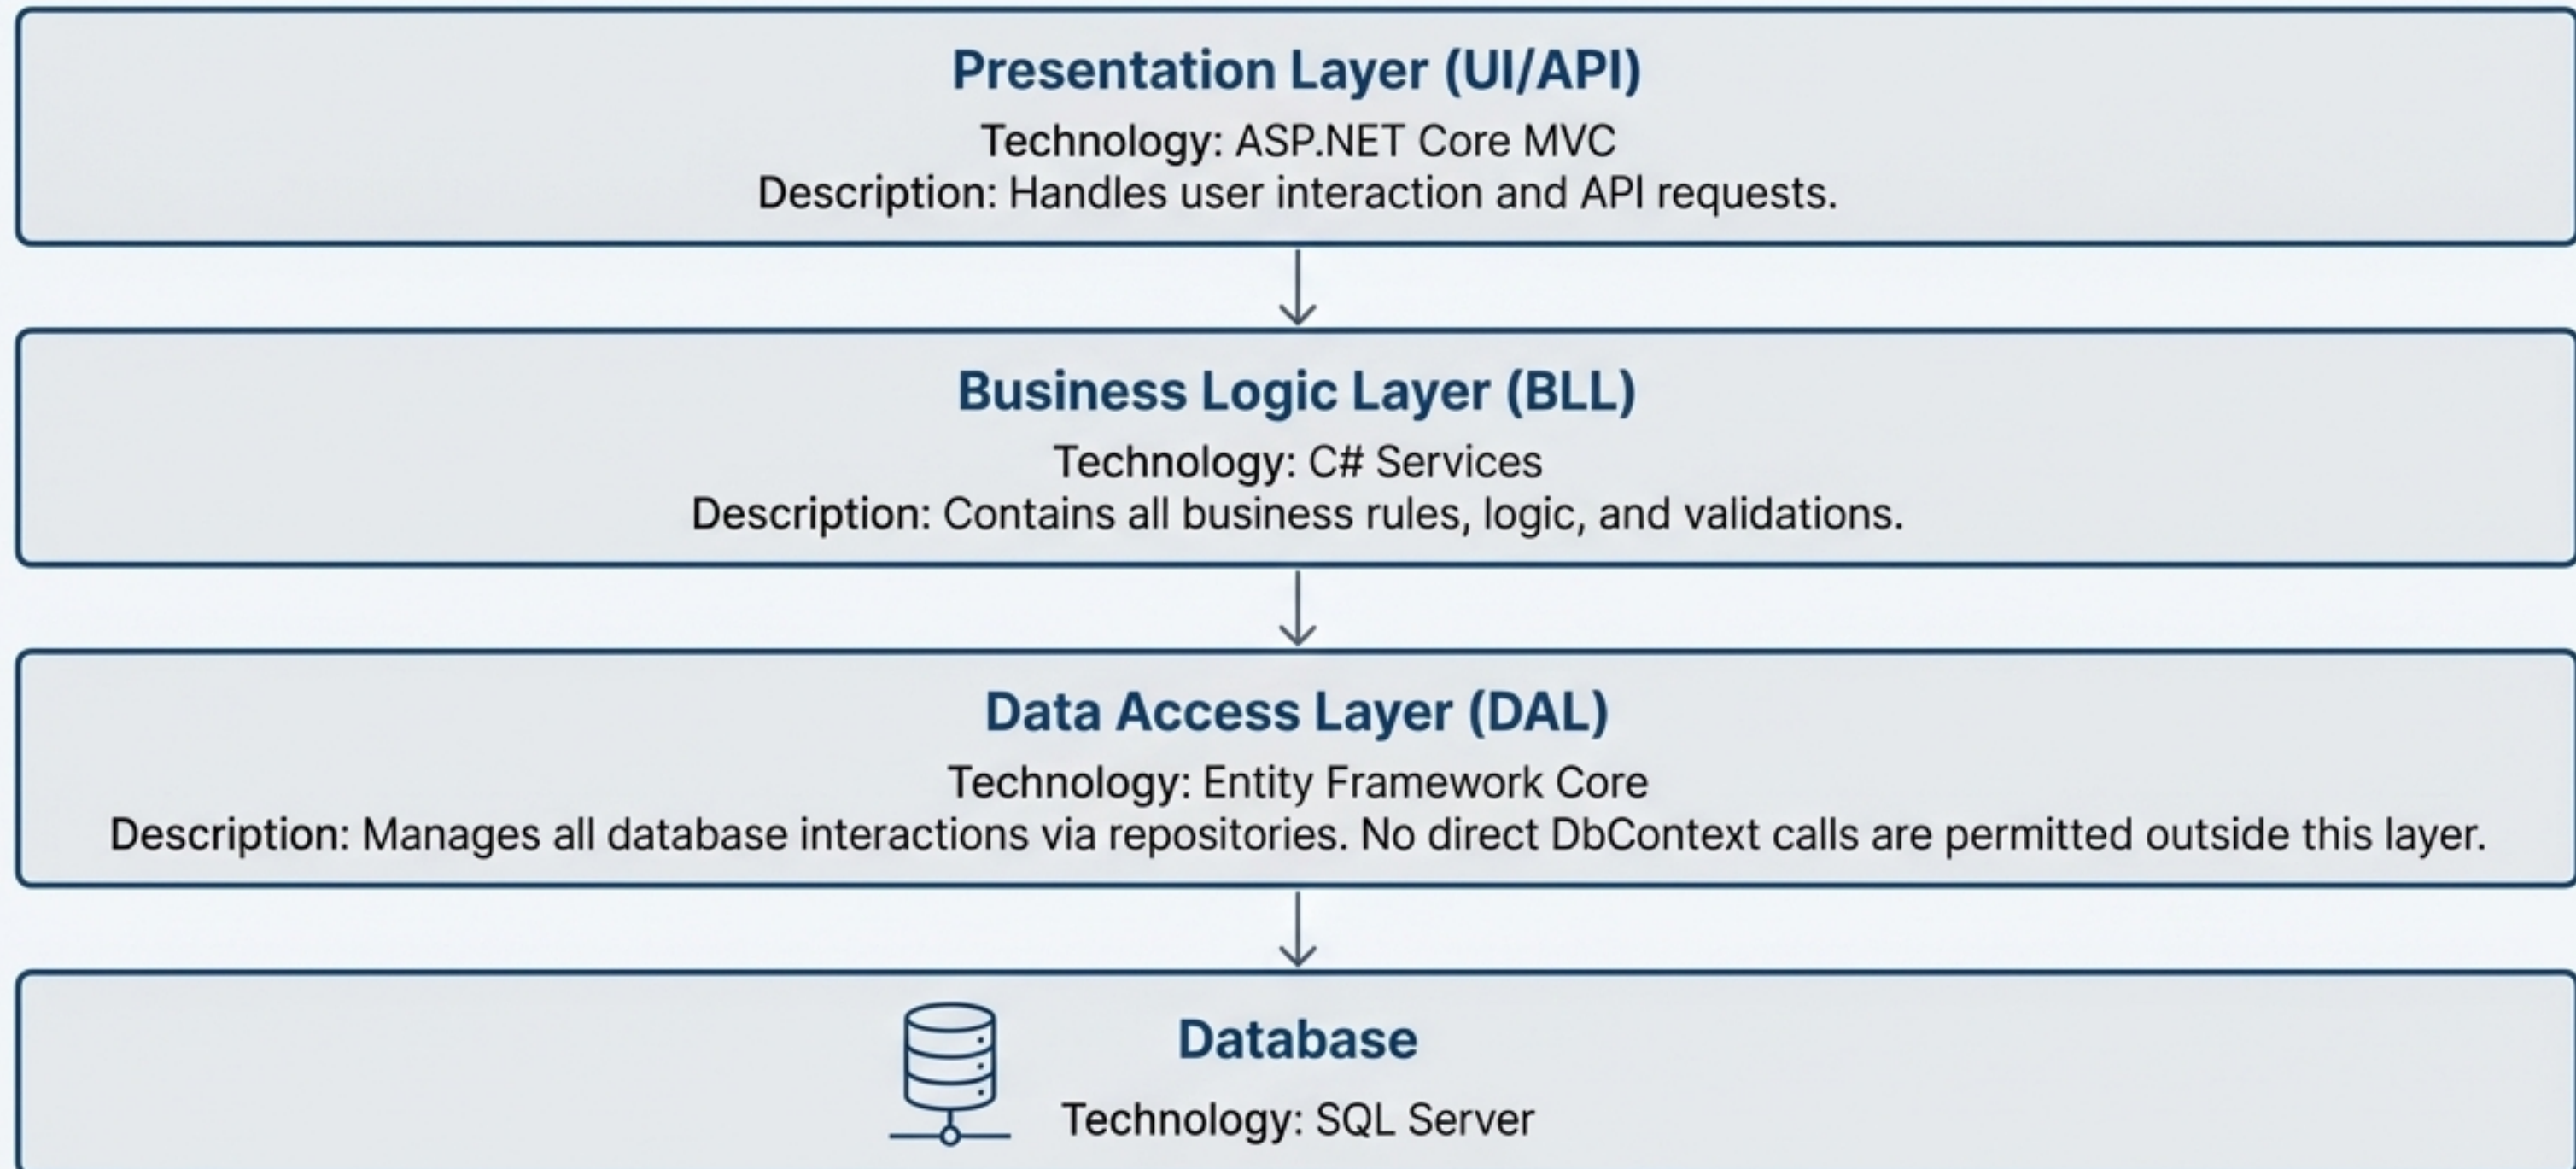

The Student: A Focused and Engaging Learning Journey

- ✓ **Course Discovery:** Browse, search, and filter a rich catalog of courses by category and price.
- ✓ **Personalized Dashboard:** Track enrolled courses, view lesson progress, and resume learning with a single click.
- ✓ **Profile Management:** Easily manage personal information and view learning statistics.
- ✓ **Flexible Enrollment:** Enroll in free courses instantly or subscribe for premium access to the entire catalog.

The Blueprint: Built on a Foundation of N-Tier Architecture

To ensure scalability, maintainability, and testability, the entire platform is built using a strict N-Tier architecture. This enforces a clear Separation of Concerns between layers.

Core Technologies & Engineering Principles

Backend & Framework

C#
ASP.NET Core MVC

Database & ORM

SQL Server
Entity Framework Core

Identity & Security

ASP.NET Core Identity

Frontend

HTML5
CSS3
Bootstrap
JavaScript

Architecture & Principles

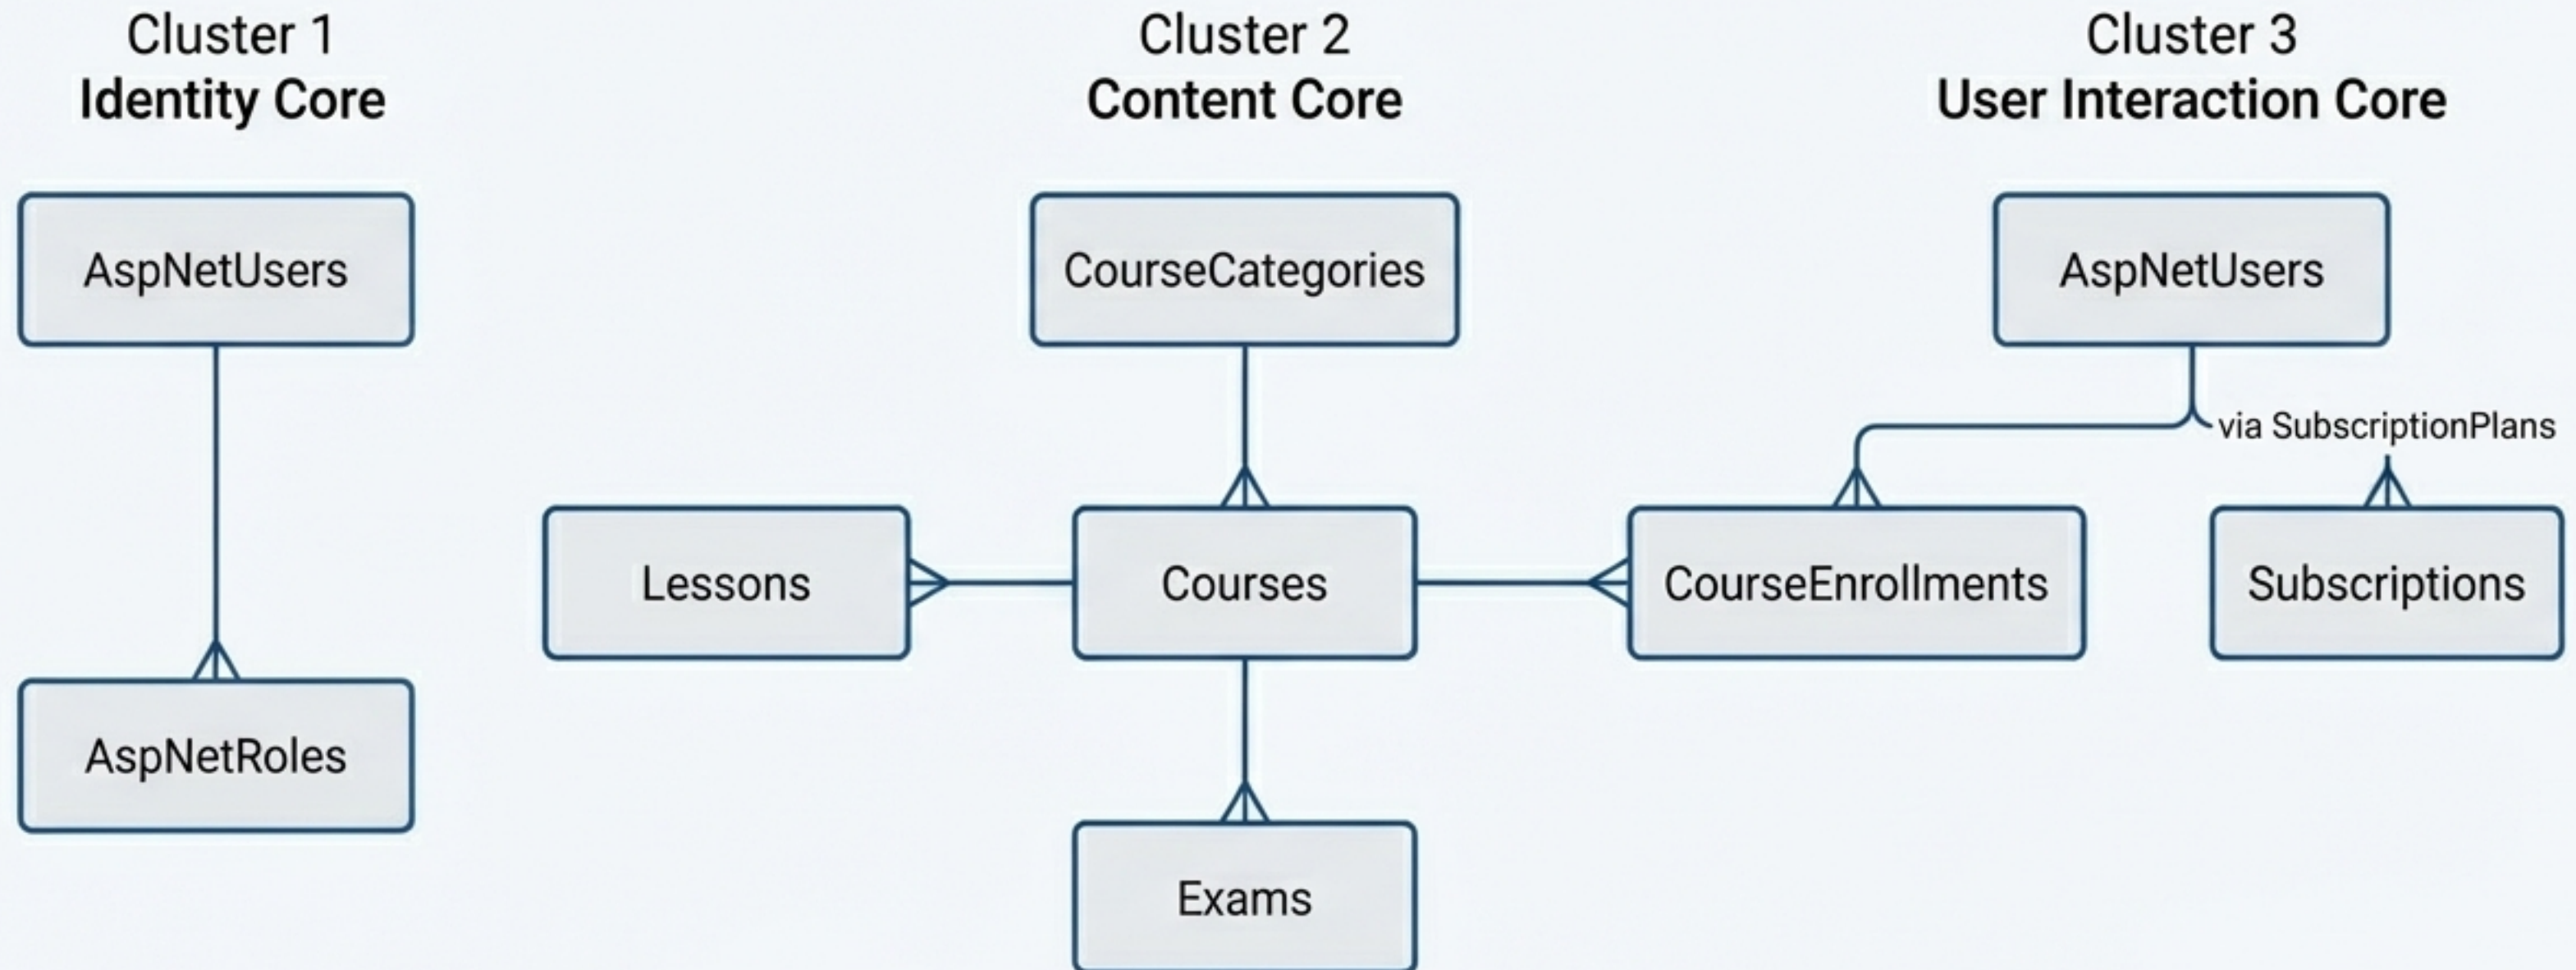

N-Tier Architecture
Dependency Injection (DI)

Version Control

Git & GitHub

The Data Model: A Relational Core for Learning and Management

The database schema is organized into two primary domains: Identity management via ASP.NET Identity, and the core E-Learning content structure.

Measuring Success: A Commitment to Quantifiable Quality

Project success was not left to chance. We defined and tracked five Key Performance Indicators (KPIs) to enforce architectural compliance, code quality, and system reliability throughout the development lifecycle.

**System
Functionality
Completion**

**Architecture &
Code Quality**

**Testing &
Reliability**

**Performance &
Efficiency**

Defect Rate

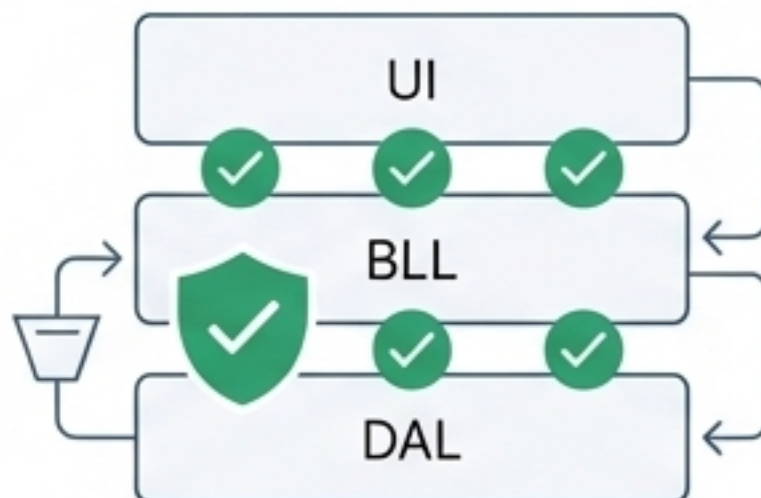

Key Performance Indicators: Goals and Results

System Functionality Completion Rate

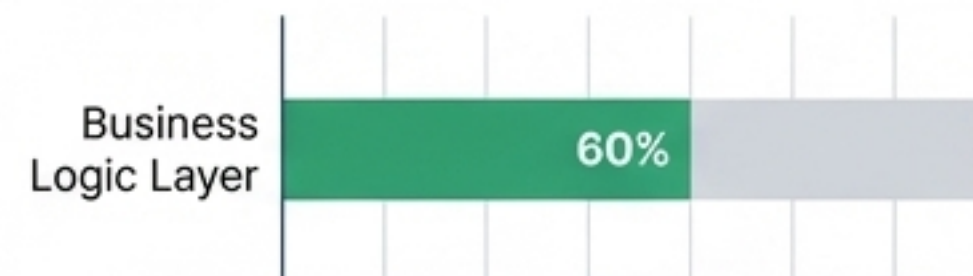

Goal: **100%** completion of **14 defined core features**.

Architecture Compliance Score

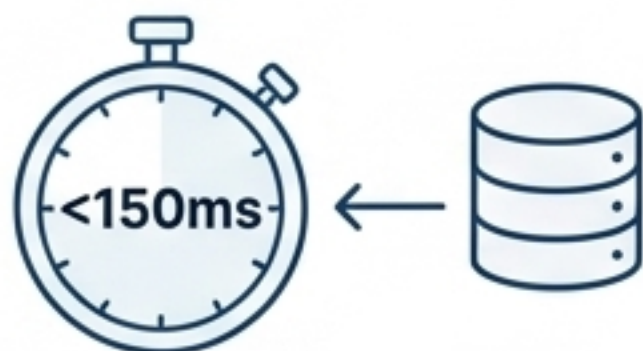

Unit Test Coverage

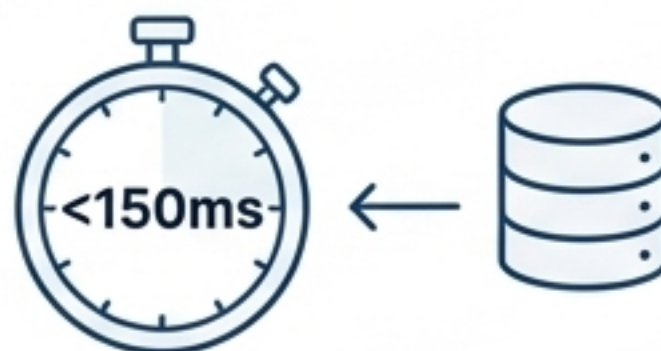

Goal: Minimum of **60%** test coverage for the Business Logic Layer.

Database Query Performance

Goal: No single query to exceed **150ms** execution time.

Database Query Performance

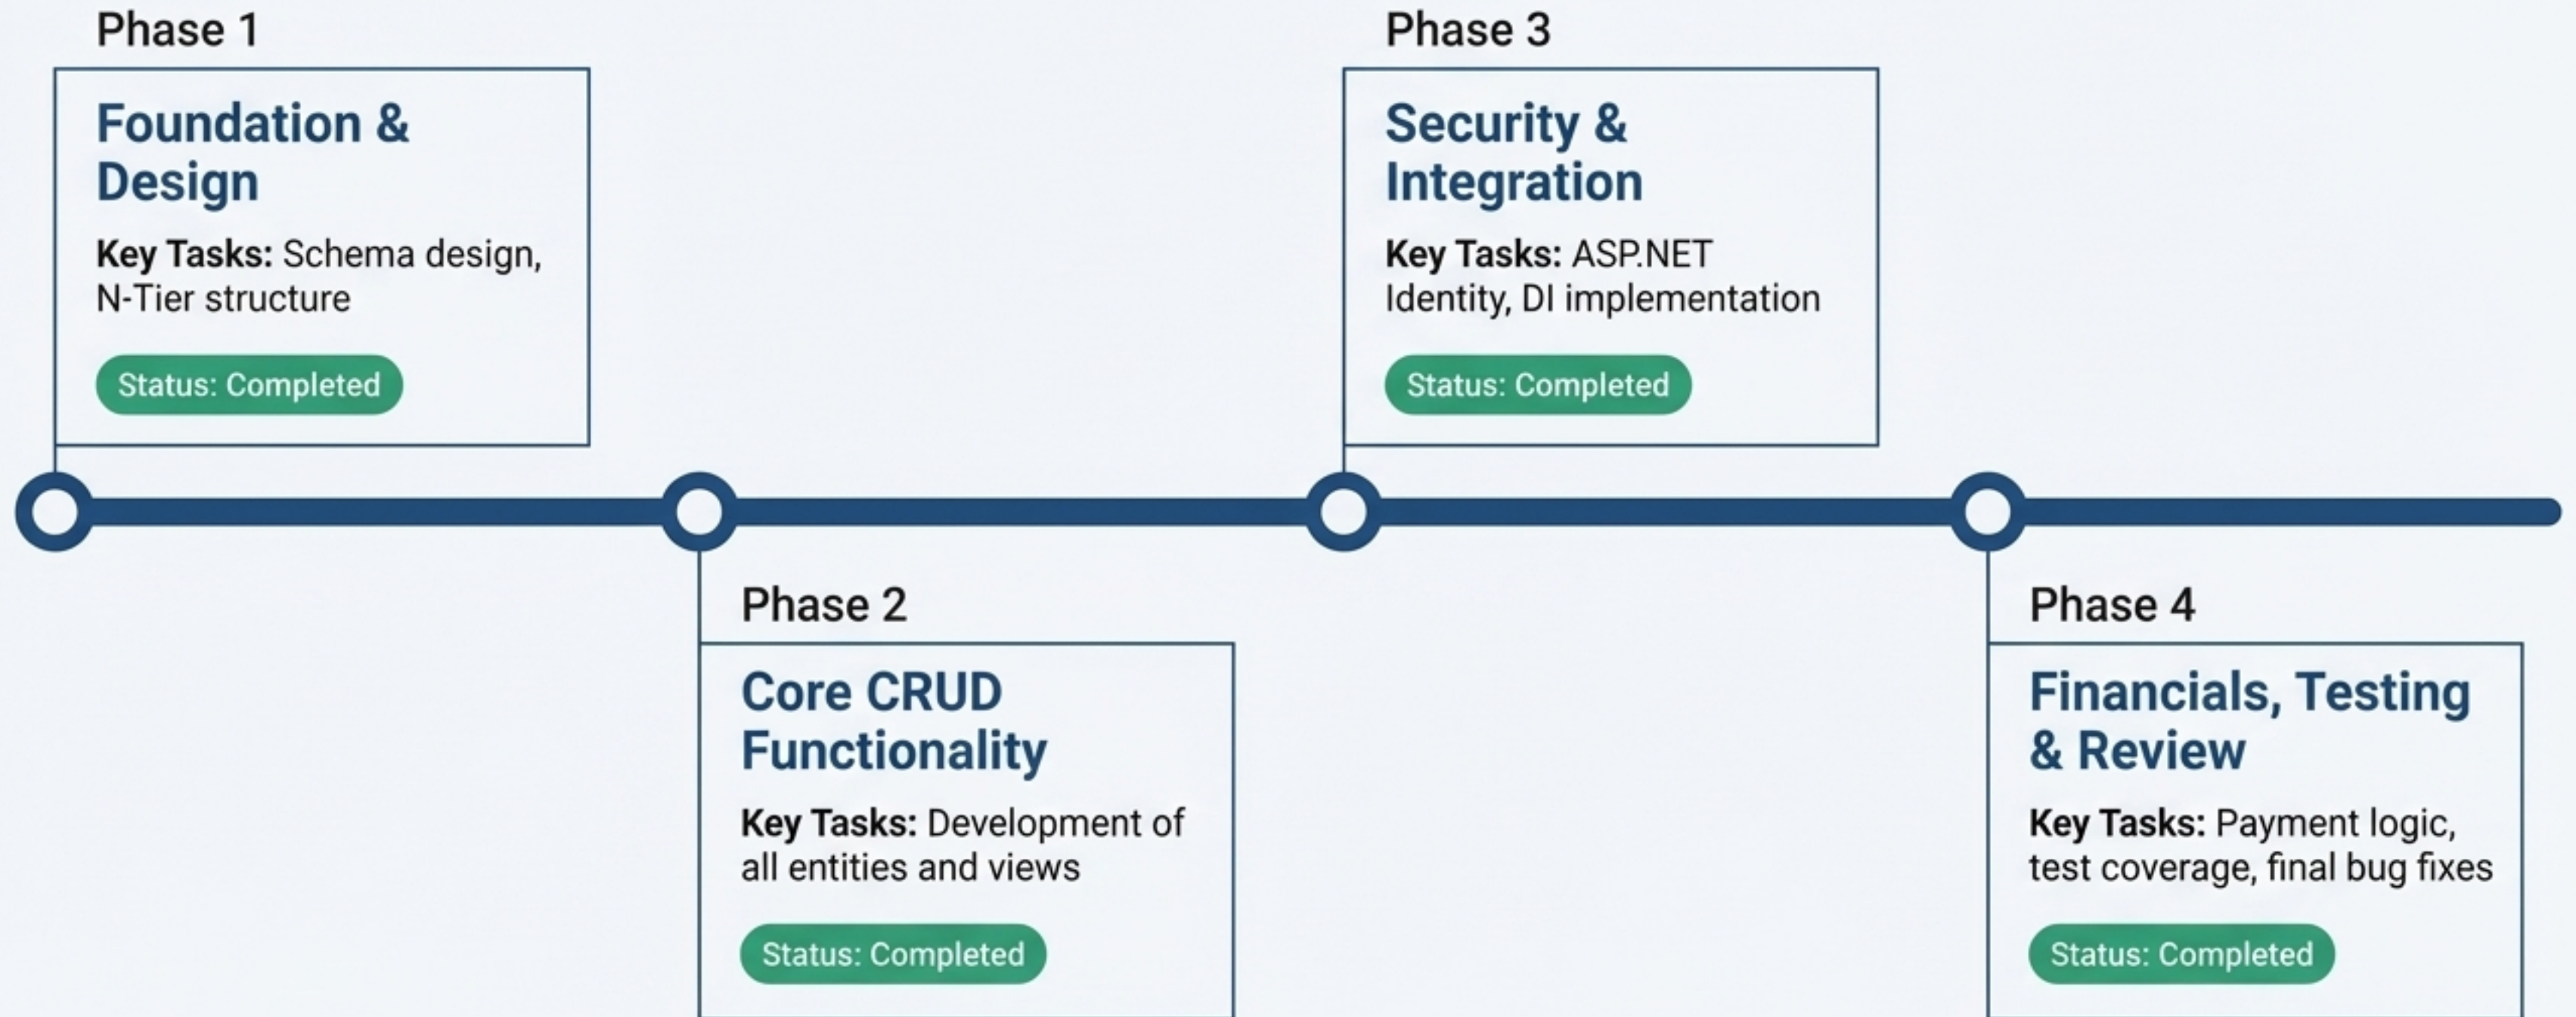

Goal: No single query to exceed **150ms** execution time.

Critical Defect Rate

Goal: No more than **1 bug per 50 test cases**, with all critical bugs resolved.

A Disciplined Development Lifecycle

Bedaya: A Scalable E-Learning Platform, Ready for the Future

Bedaya successfully delivers a modern, robust, and role-based e-learning environment. Its disciplined N-Tier architecture ensures it is not only functional today but also maintainable and scalable for future enhancements.
