Platform Overview

Bedaya is a unified educational platform designed to simplify learning for students, enable teachers to manage courses efficiently, and empower administrators with full system control.

The Challenge: A Fragmented Learning Experience

Lack of organized learning tools

No unified dashboards for different user roles

Difficulty in tracking student progress effectively

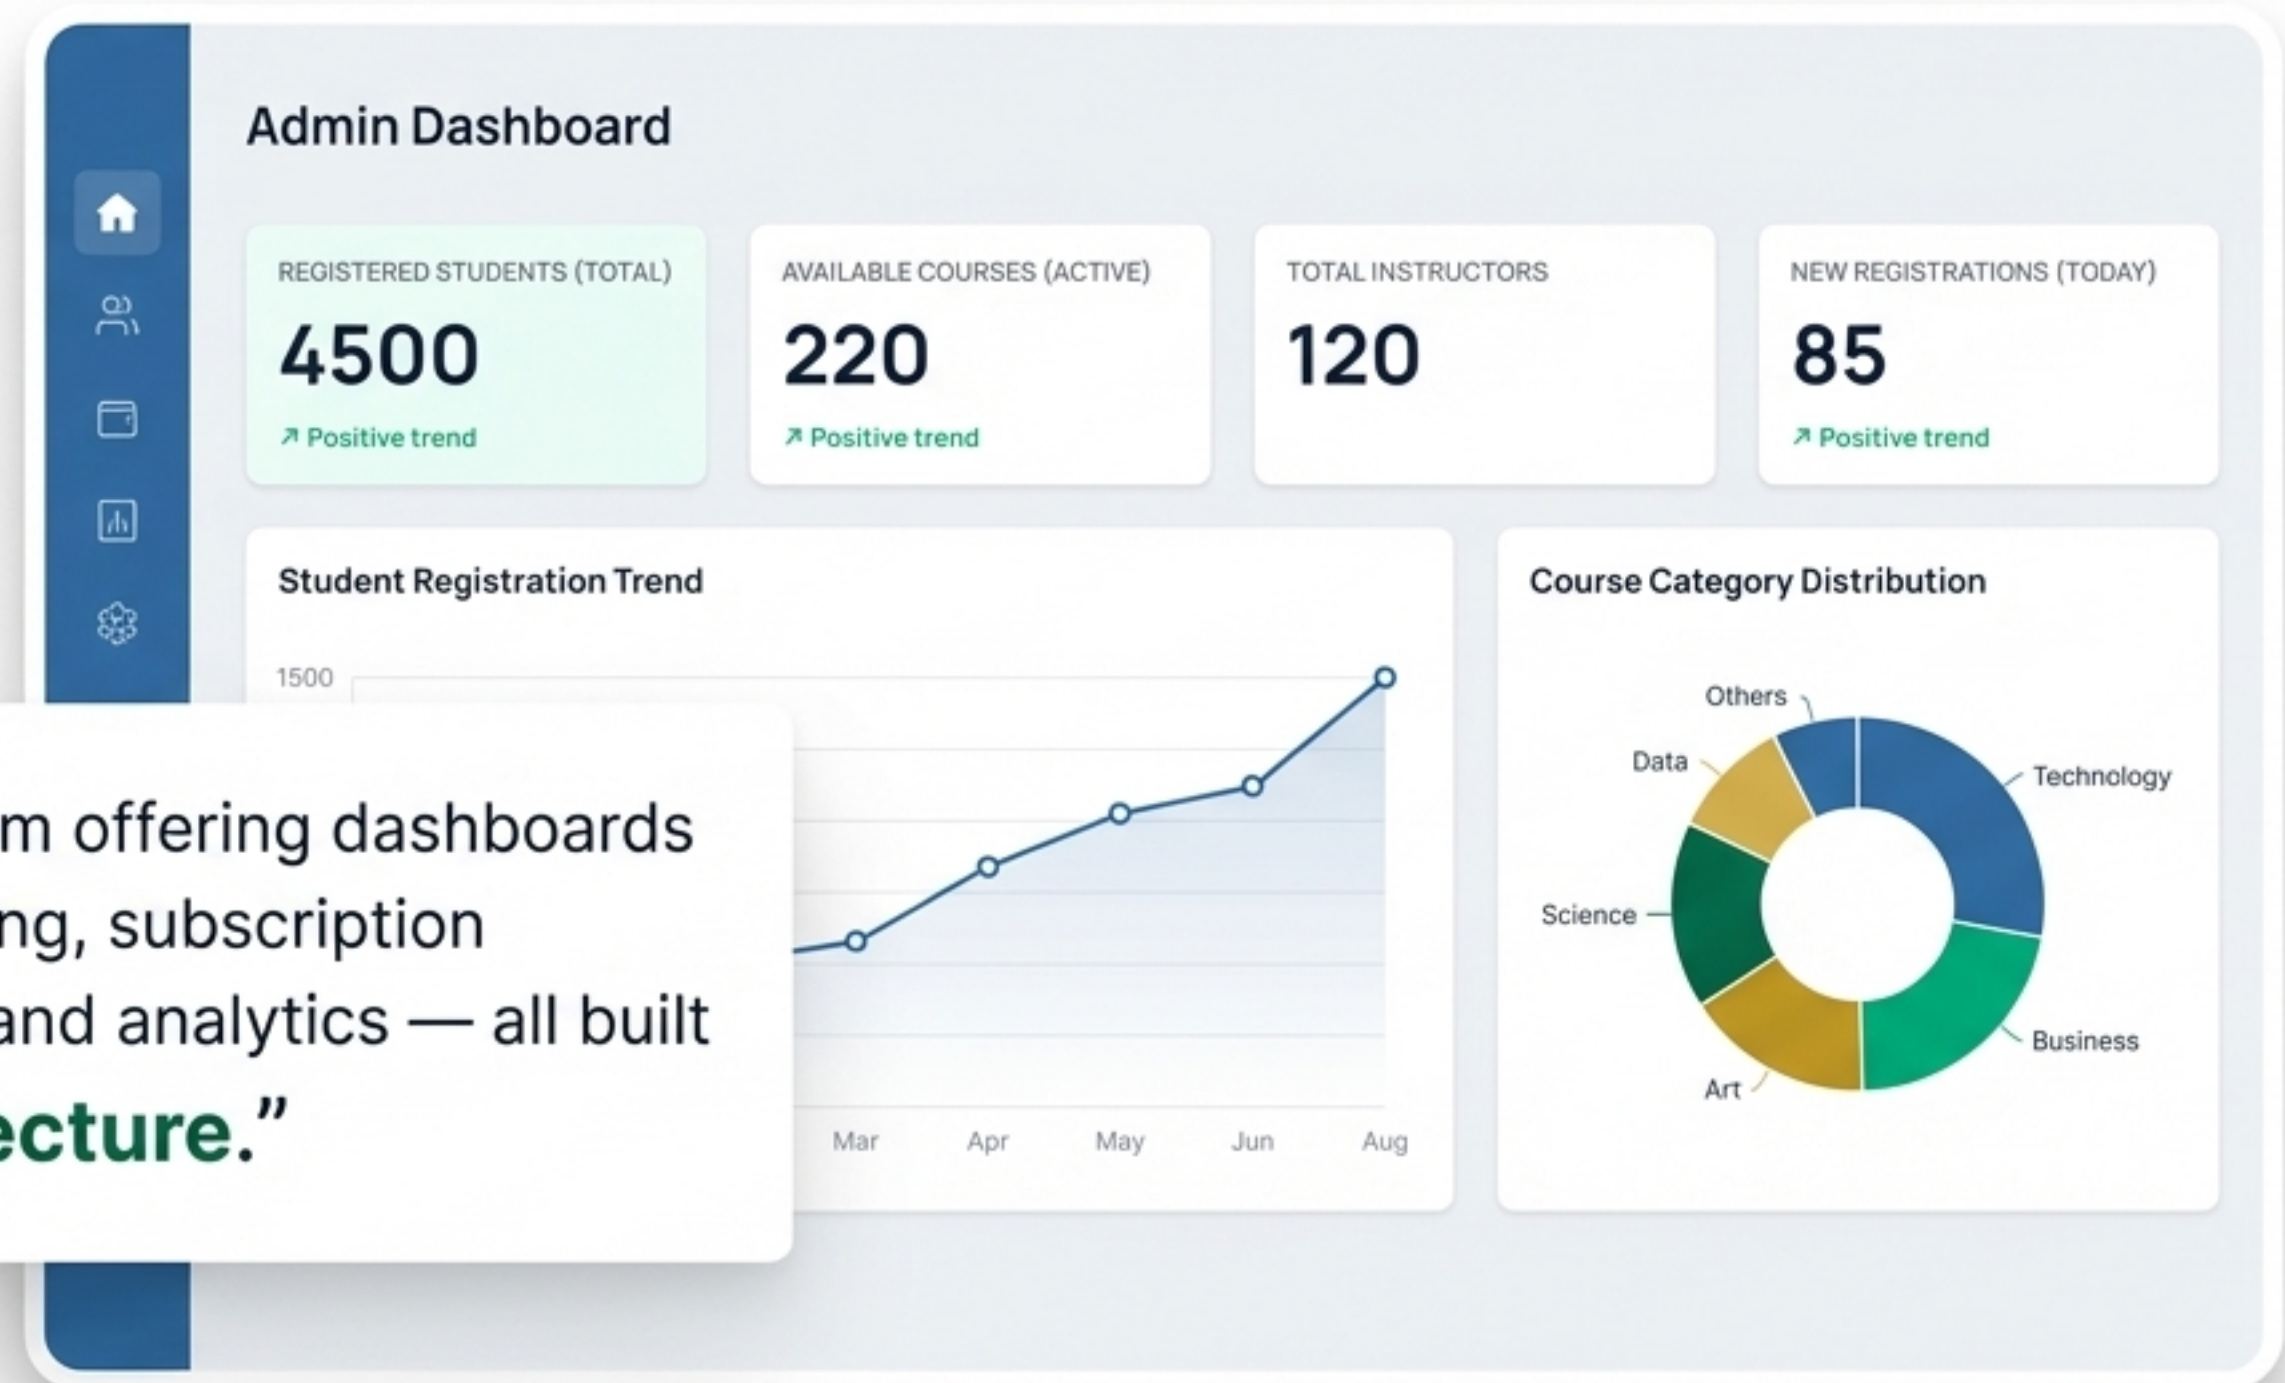

Absence of integrated management for subscriptions or content categories

Communication barriers between teachers and students

The Solution: A Unified E-Learning Ecosystem

“A complete e-learning system offering dashboards for each role, course publishing, subscription management, assessments, and analytics — all built on a clean **N-Tier Architecture.**”

Core Platform Features

Admin Panel

**Teacher
Dashboard**

**Student
Dashboard**

**Course
Management**

**Subscription
Plans**

**Categories &
Subcategories**

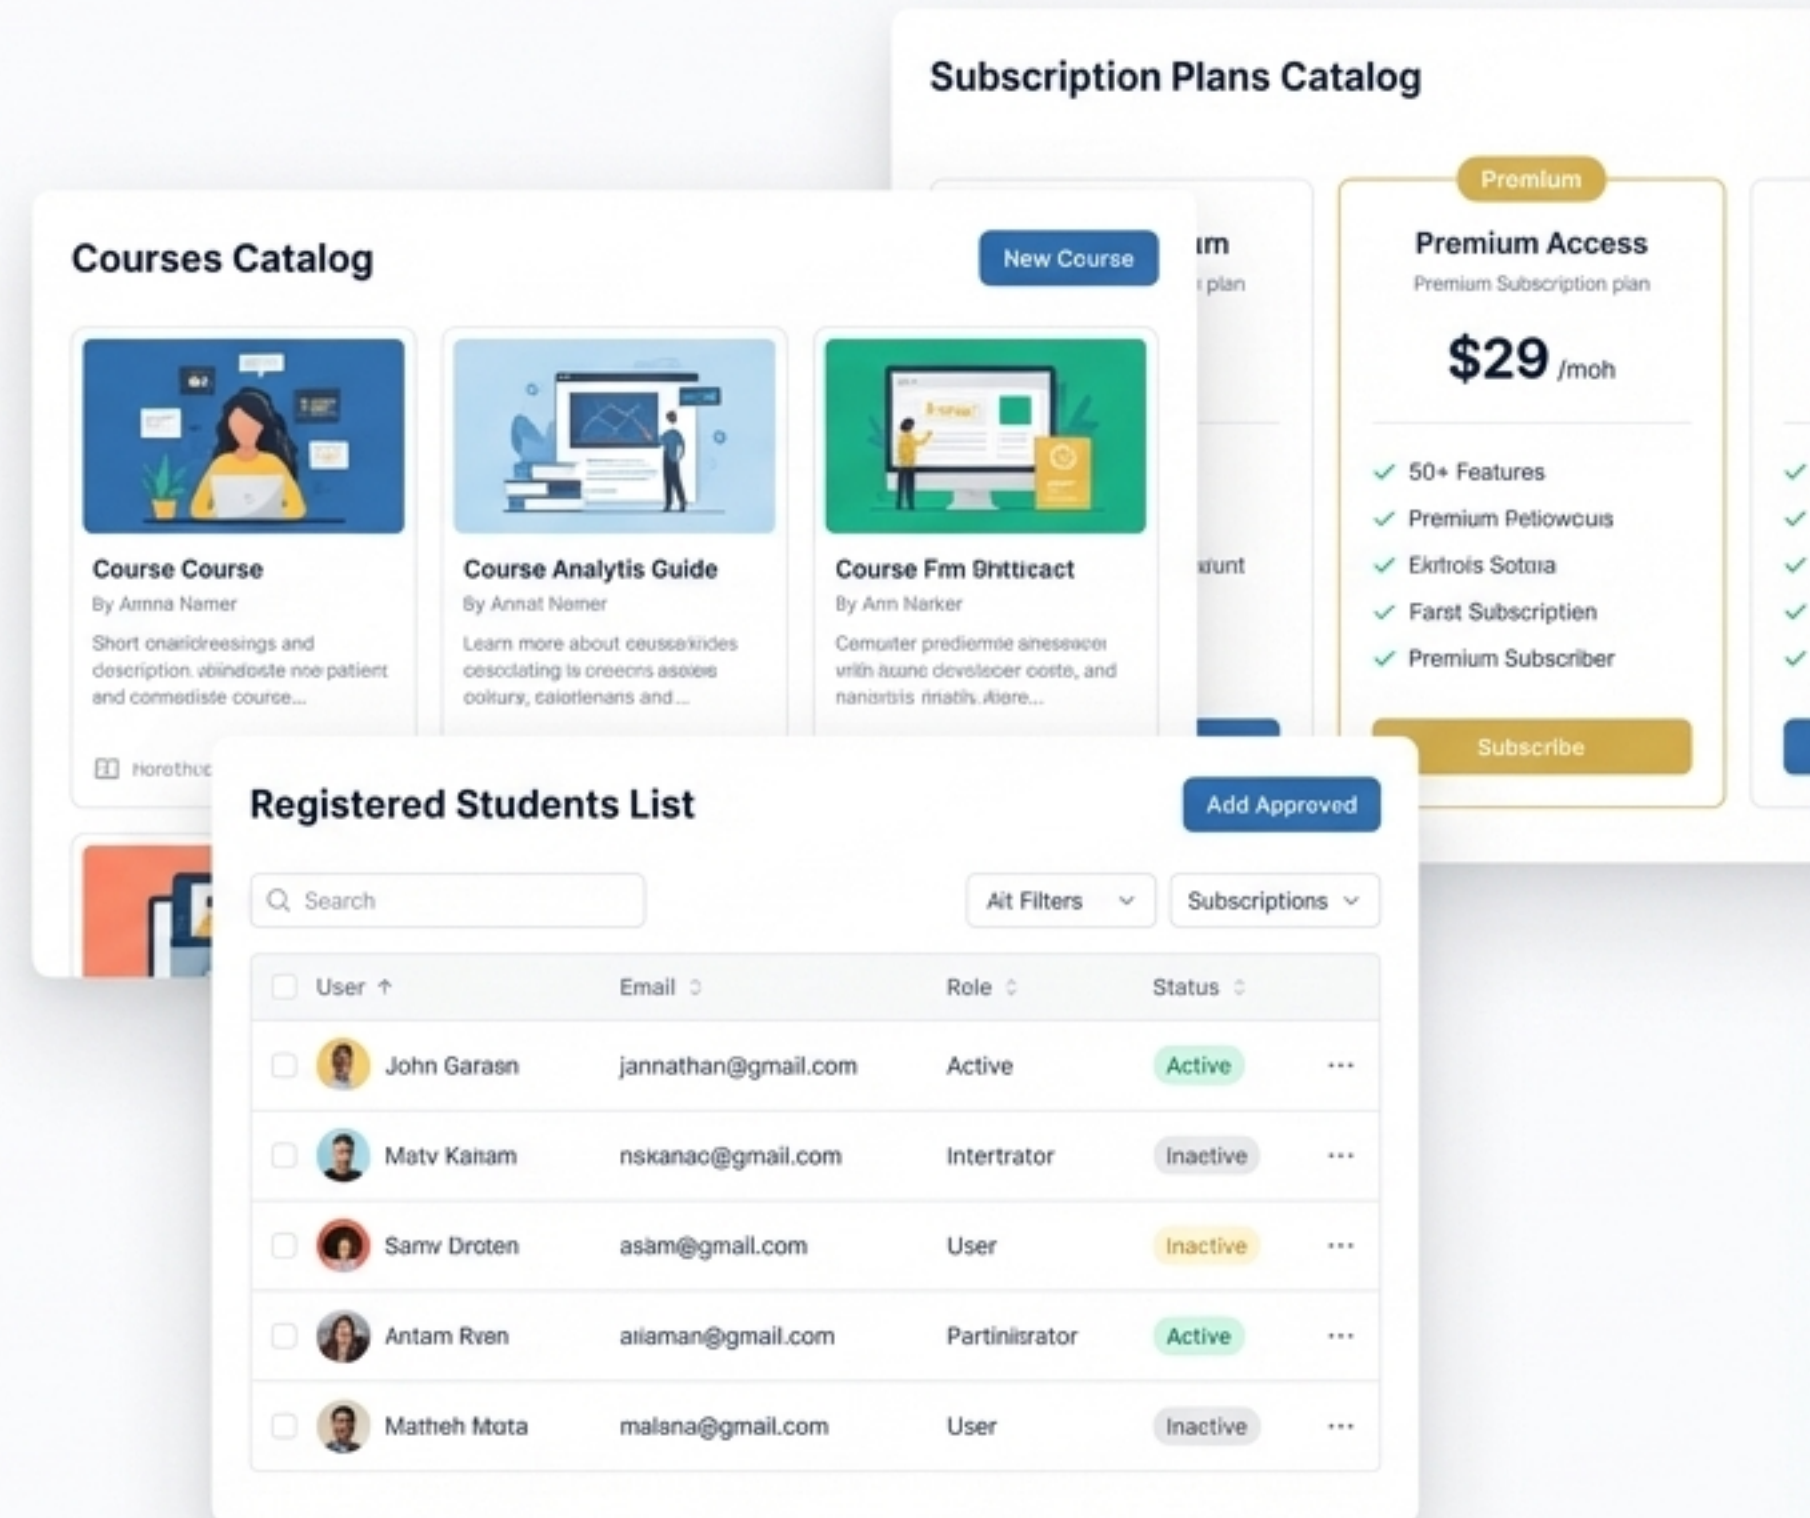

**Messaging
System**

Analytics

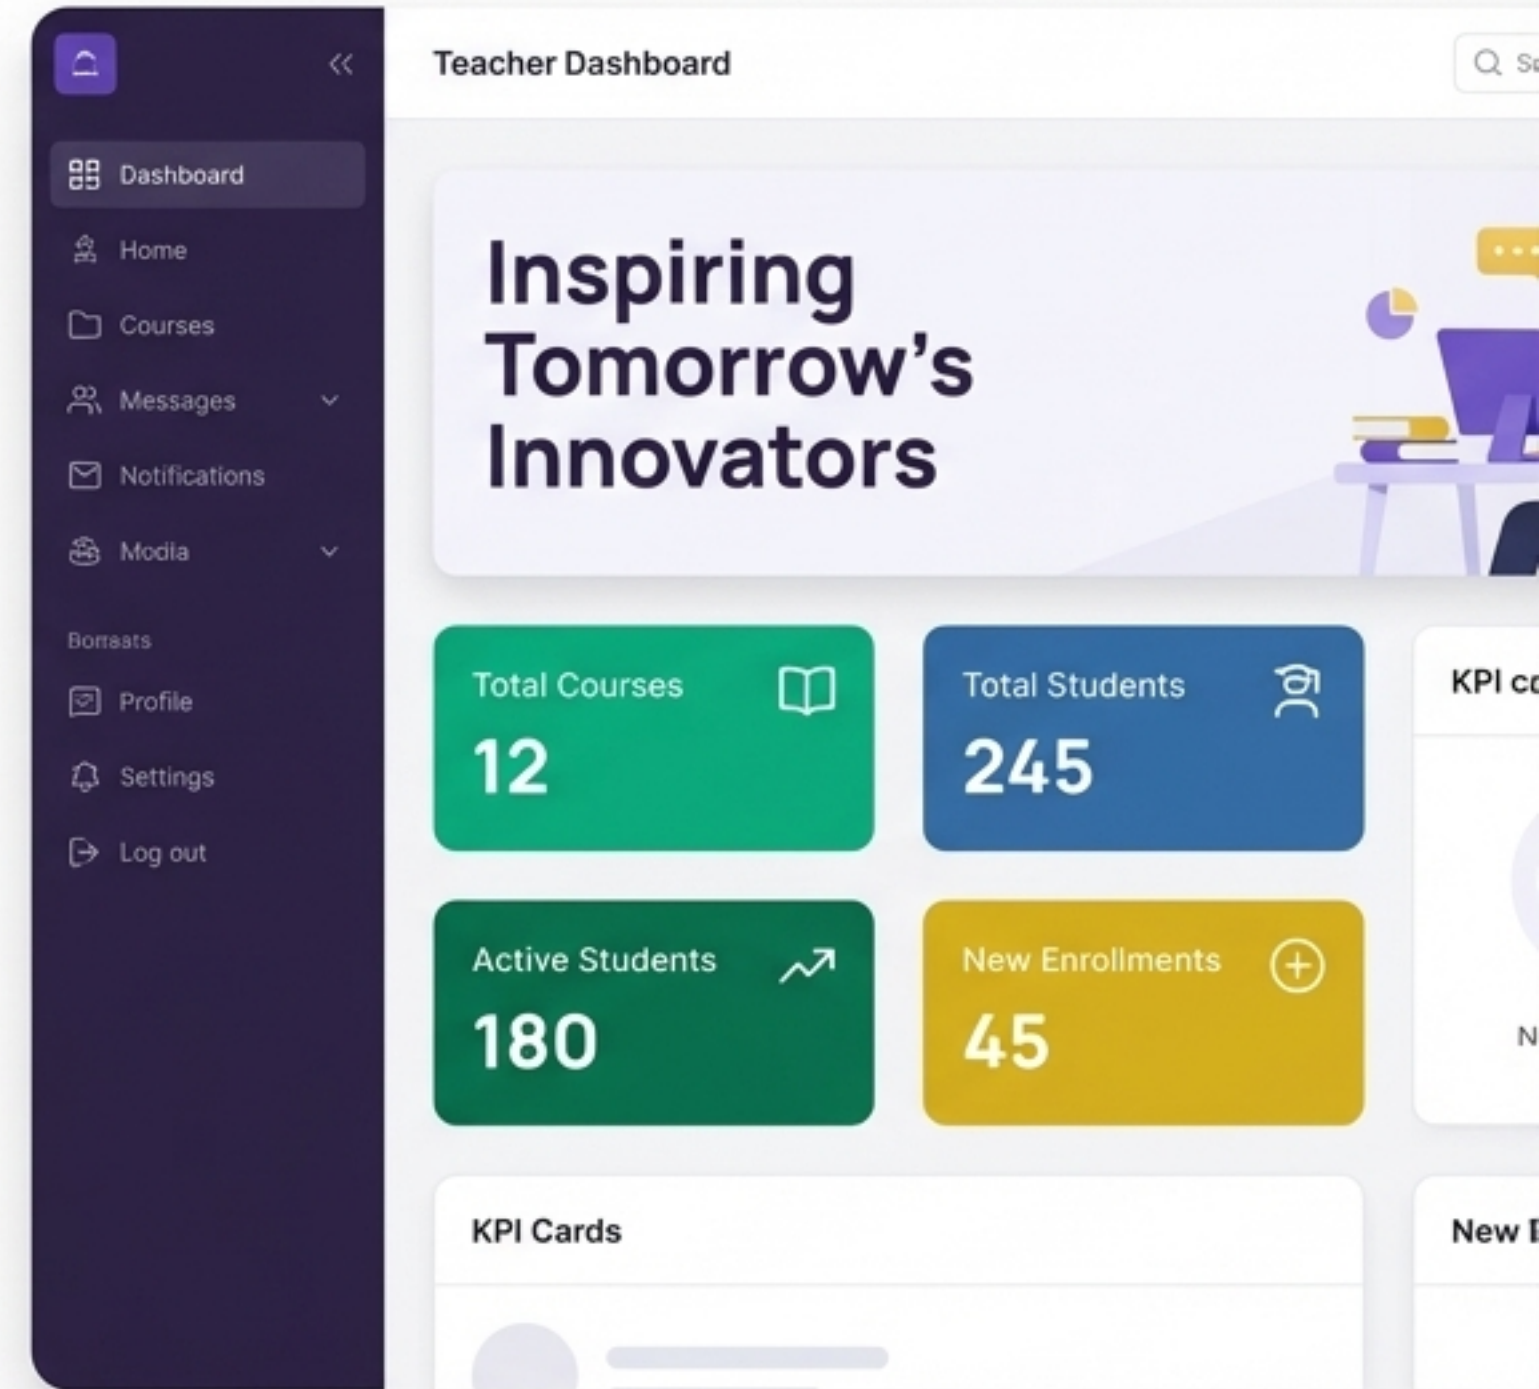

Empowering Administrators

- ✓ Manage Courses, Categories, and Subscriptions
- ✓ Oversee all Students & Teachers
- ✓ Approve and Deactivate Accounts
- ✓ View Platform-Wide Analytics

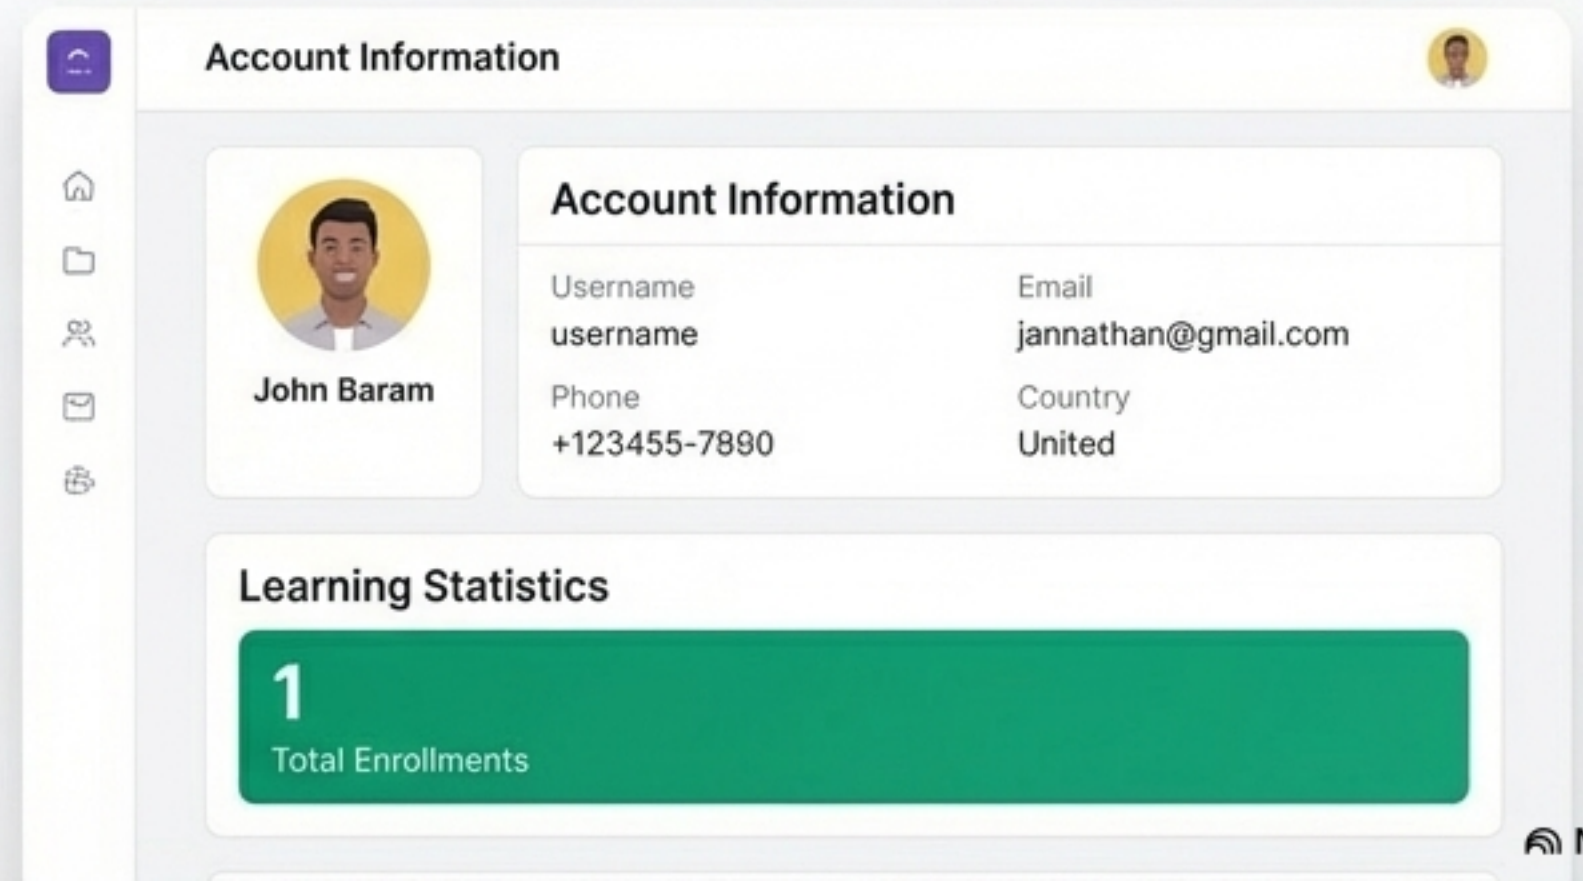

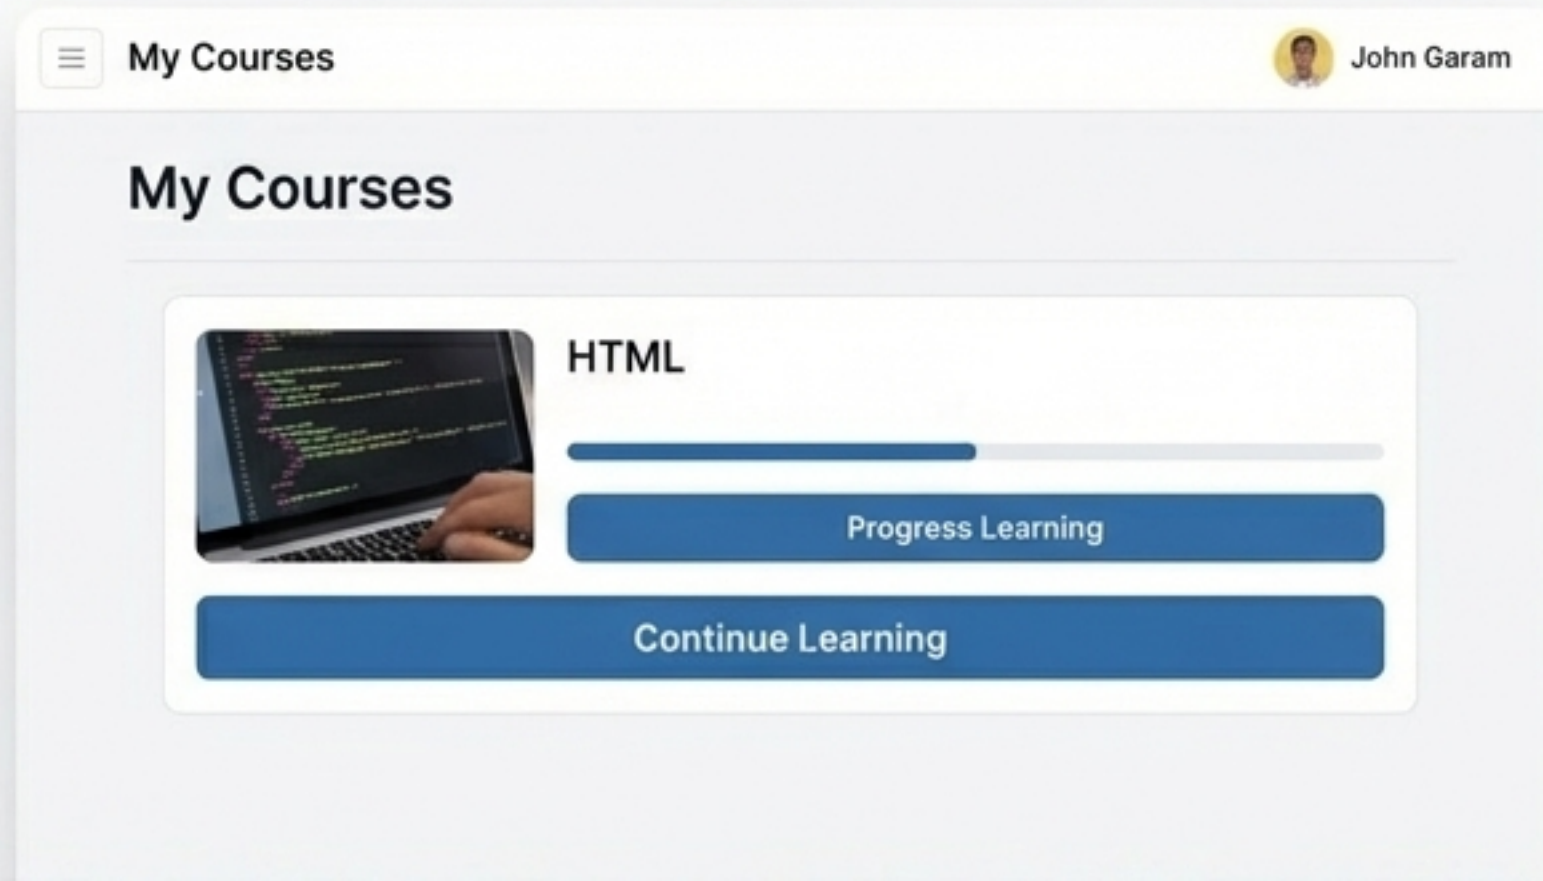

Equipping Teachers for Success

- Create & publish rich-media courses
- Add lessons, videos, and materials
- Track individual student progress
- View detailed course enrollment data
- Communicate directly with students

Streamlining the Student Journey

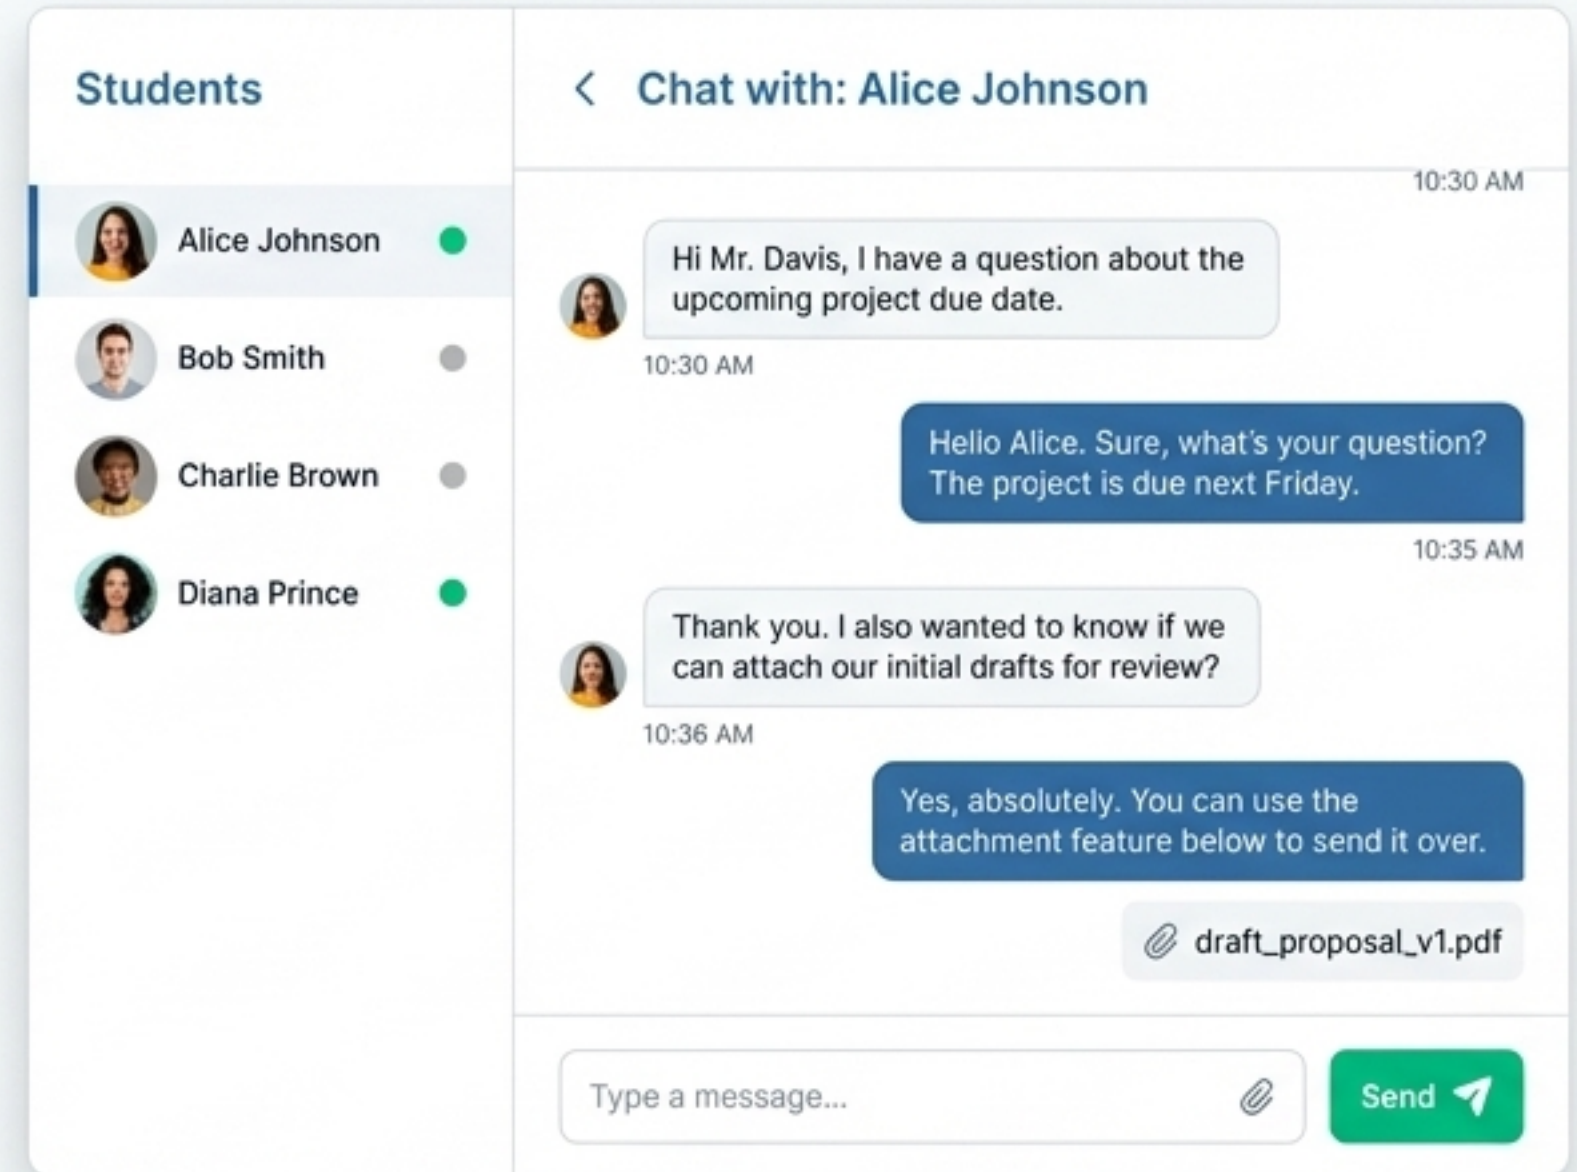

- ✓ Enroll in courses with a single click
- ✓ View lessons and track personal progress
- ✓ Manage a personalized user profile
- ✓ Browse a rich catalog of categories
- ✓ Take exams and assessments

Fostering Communication: The Integrated Messaging System

“A fully integrated messaging system allowing teachers and students to communicate seamlessly inside the platform.”

- Direct Teacher-to-Student Messaging
- Viewable Student Lists for Teachers
- Dedicated Chat Windows
- Support for Attachments

Built on a Modern, Robust Technology Stack

Backend

- ASP.NET Core MVC (For Presentation Layer & REST Endpoints)
- C#

Data & ORM

- Entity Framework Core (For database interaction and migrations)
- SQL Server

Security

- ASP.NET Core Identity (For user management, roles, and authentication)

Frontend

- HTML5, CSS3, Bootstrap, JavaScript (For user interfaces)

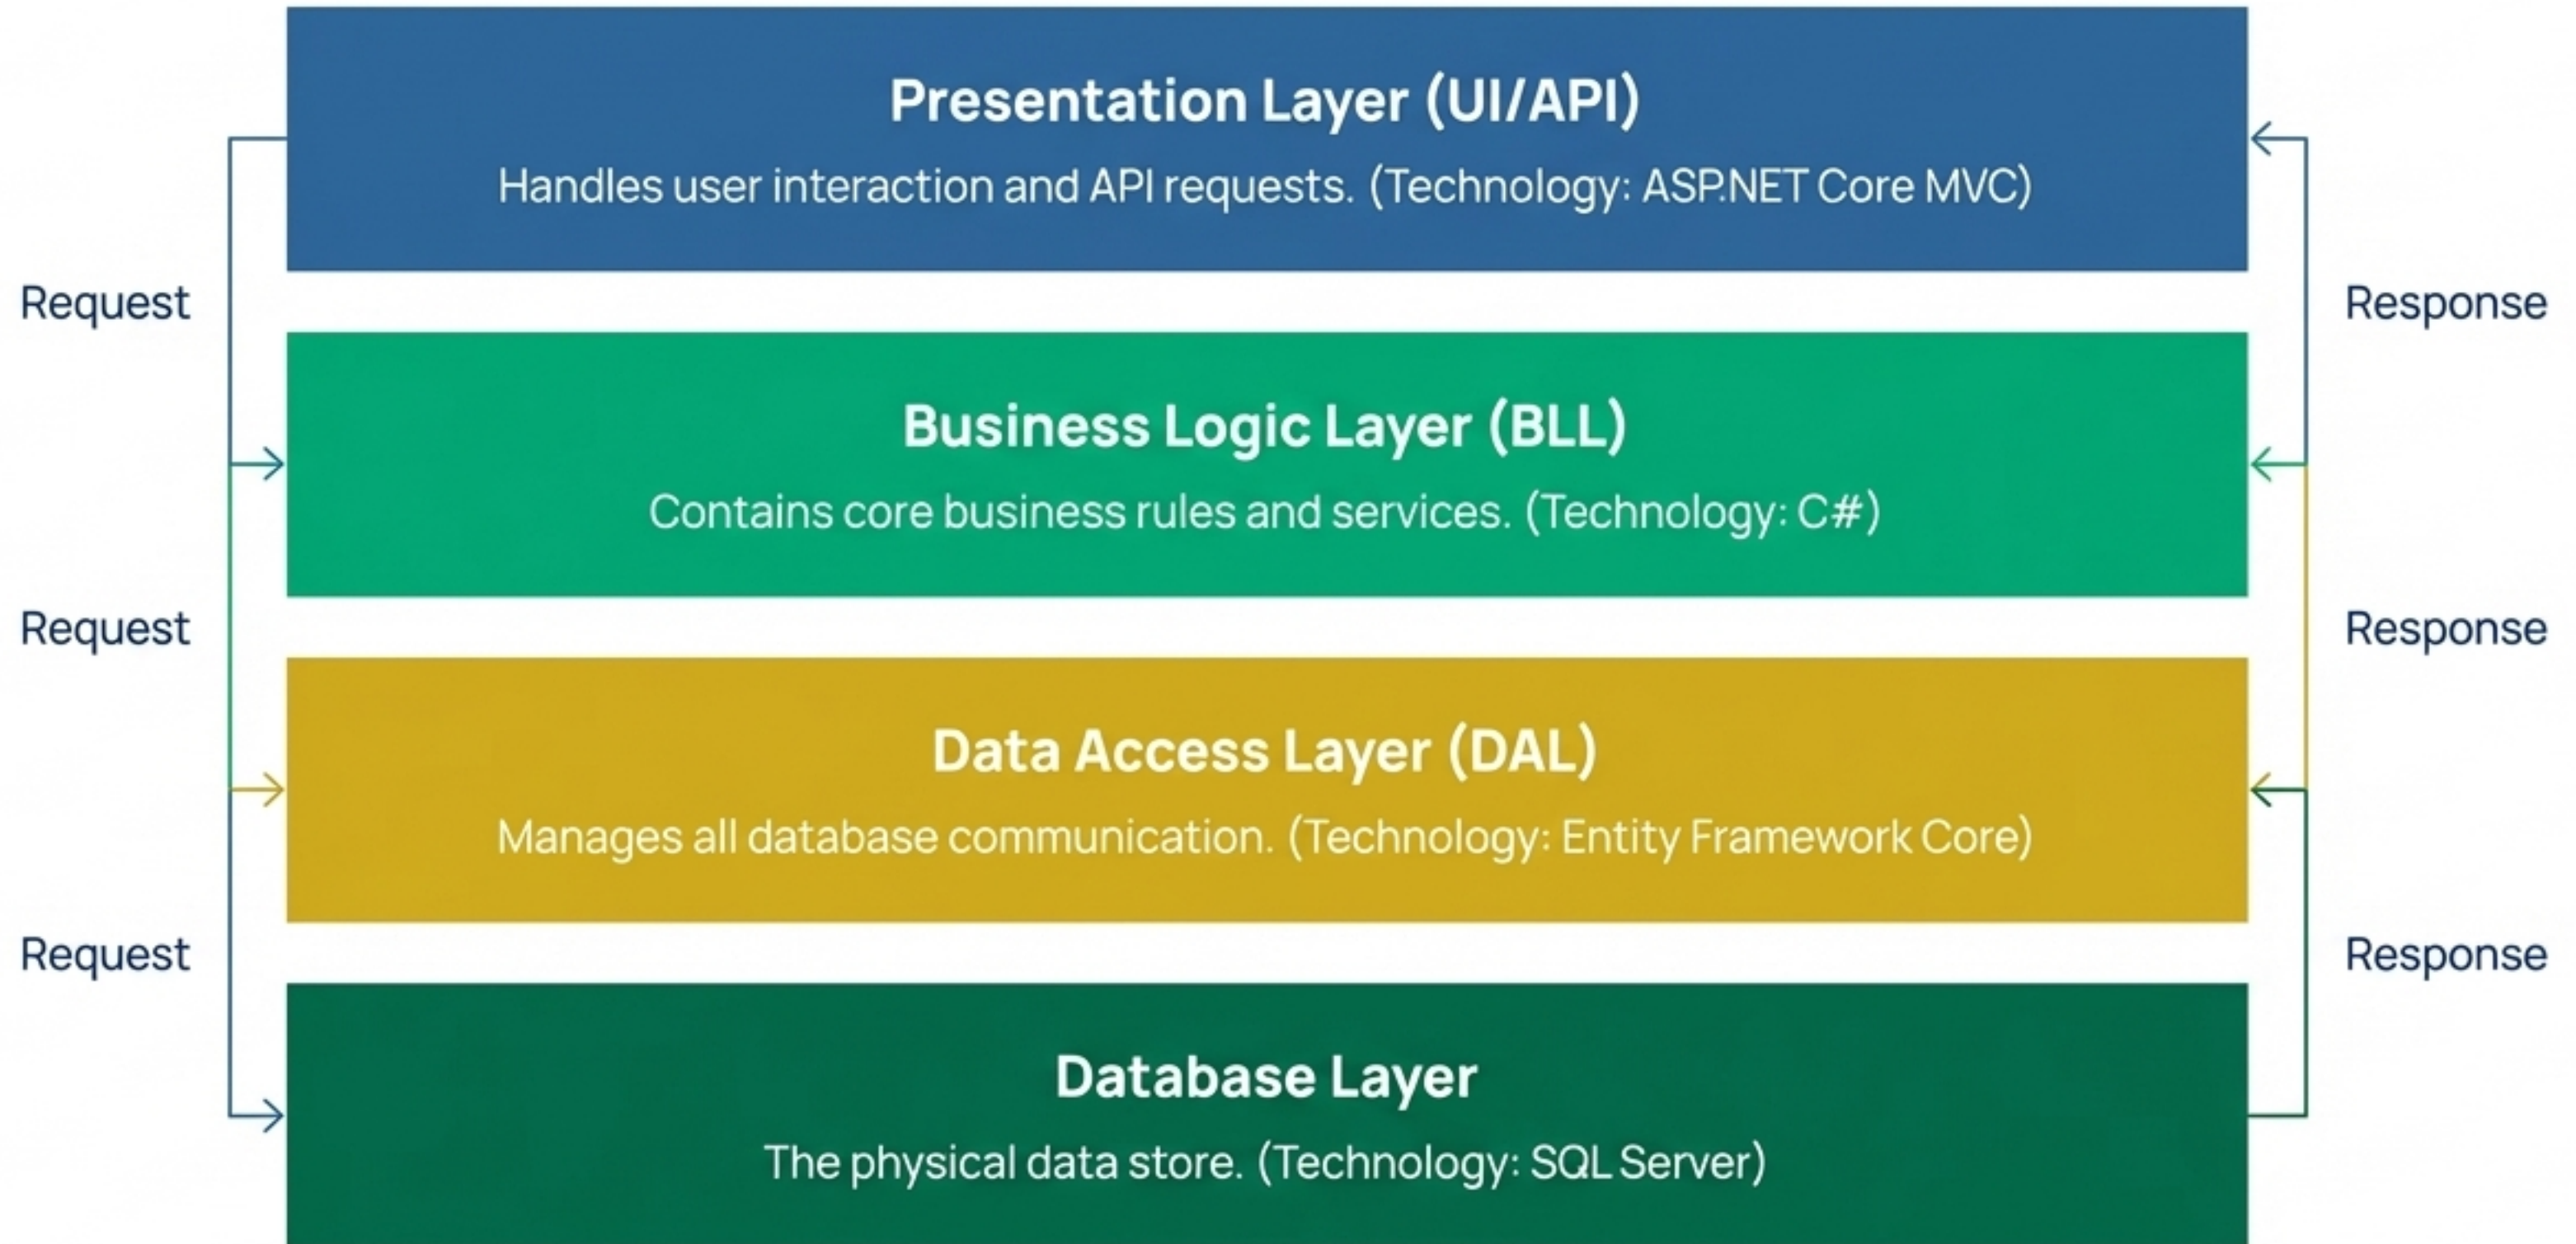

Architecture

- N-Tier & Dependency Injection (For scalability and maintainability)

A Scalable Foundation: The N-Tier Architecture

Core Principle: Strict Separation of Concerns

The Data Backbone: Database Schema

Content & Course Management

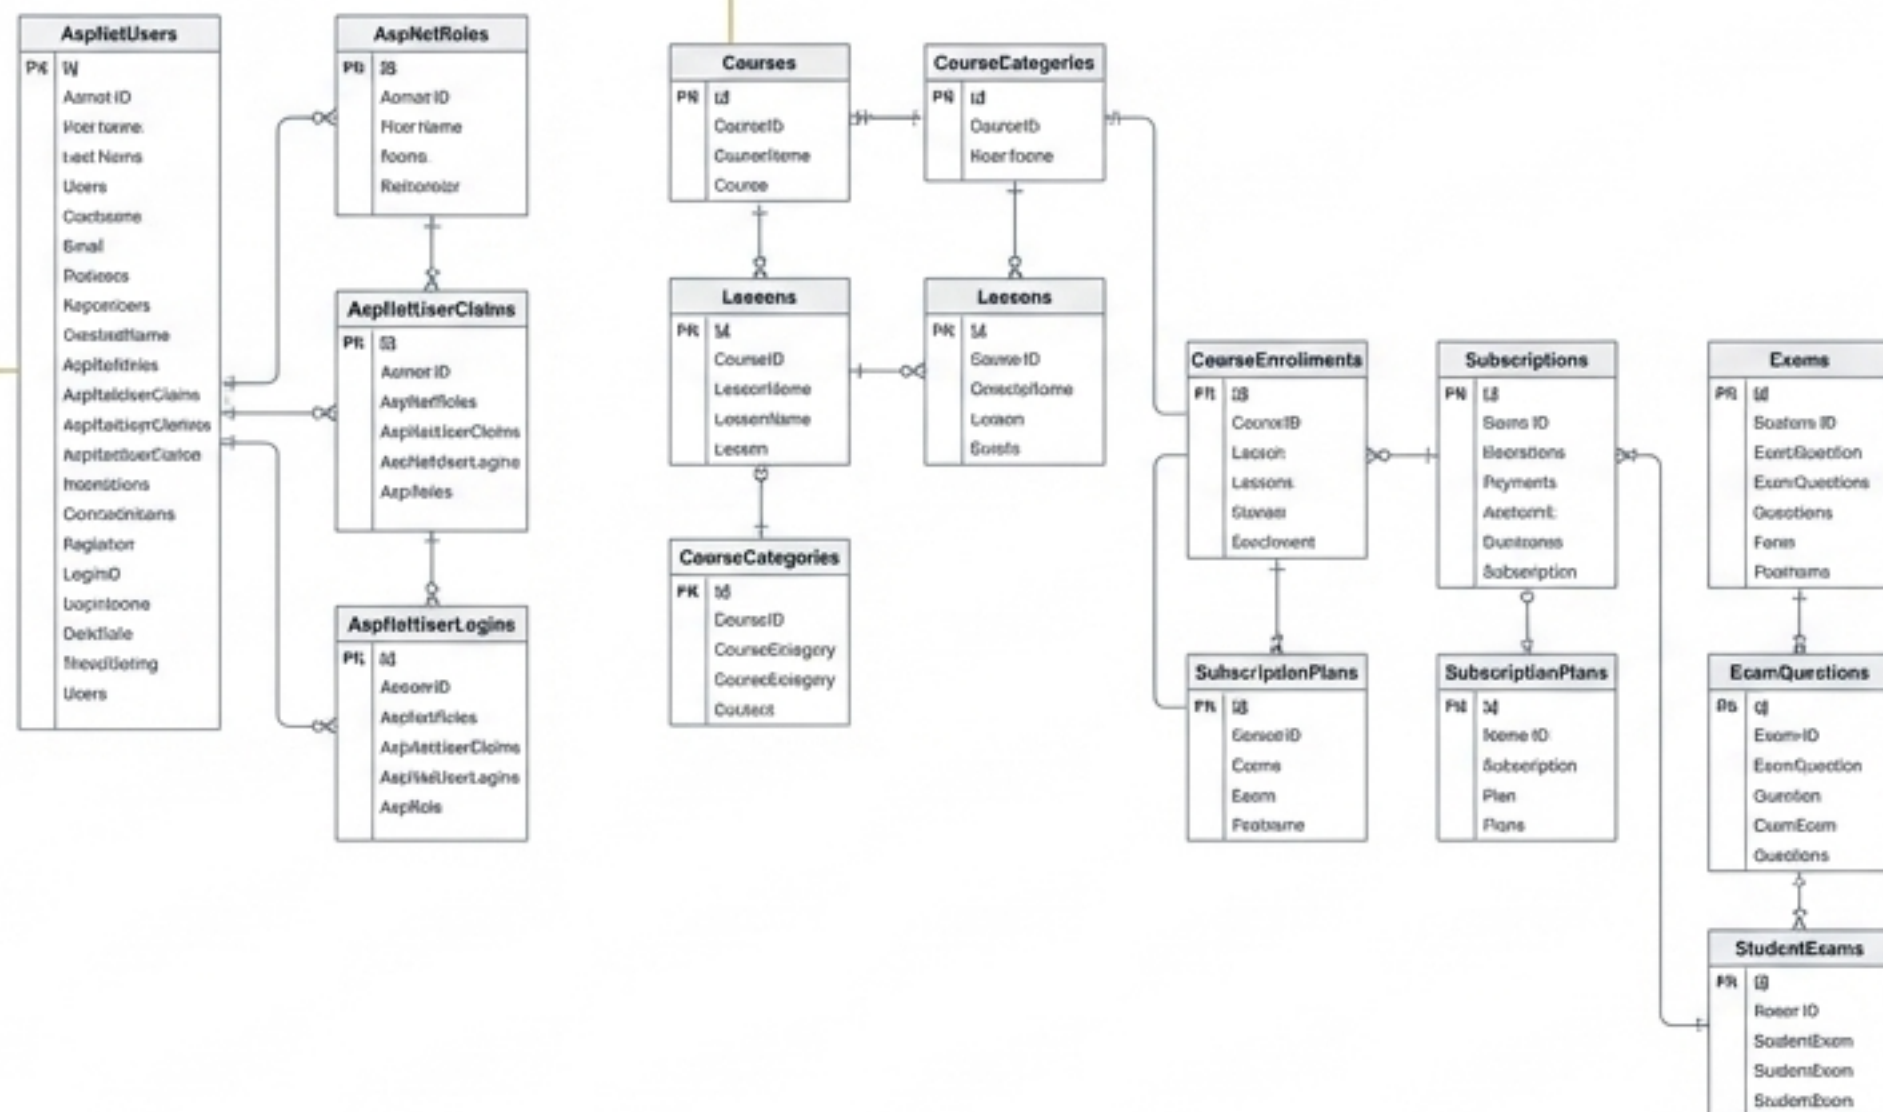

Defines the structure of all educational content.

User Interaction & Finance

Tracks enrollments,
payments, and
assessments.

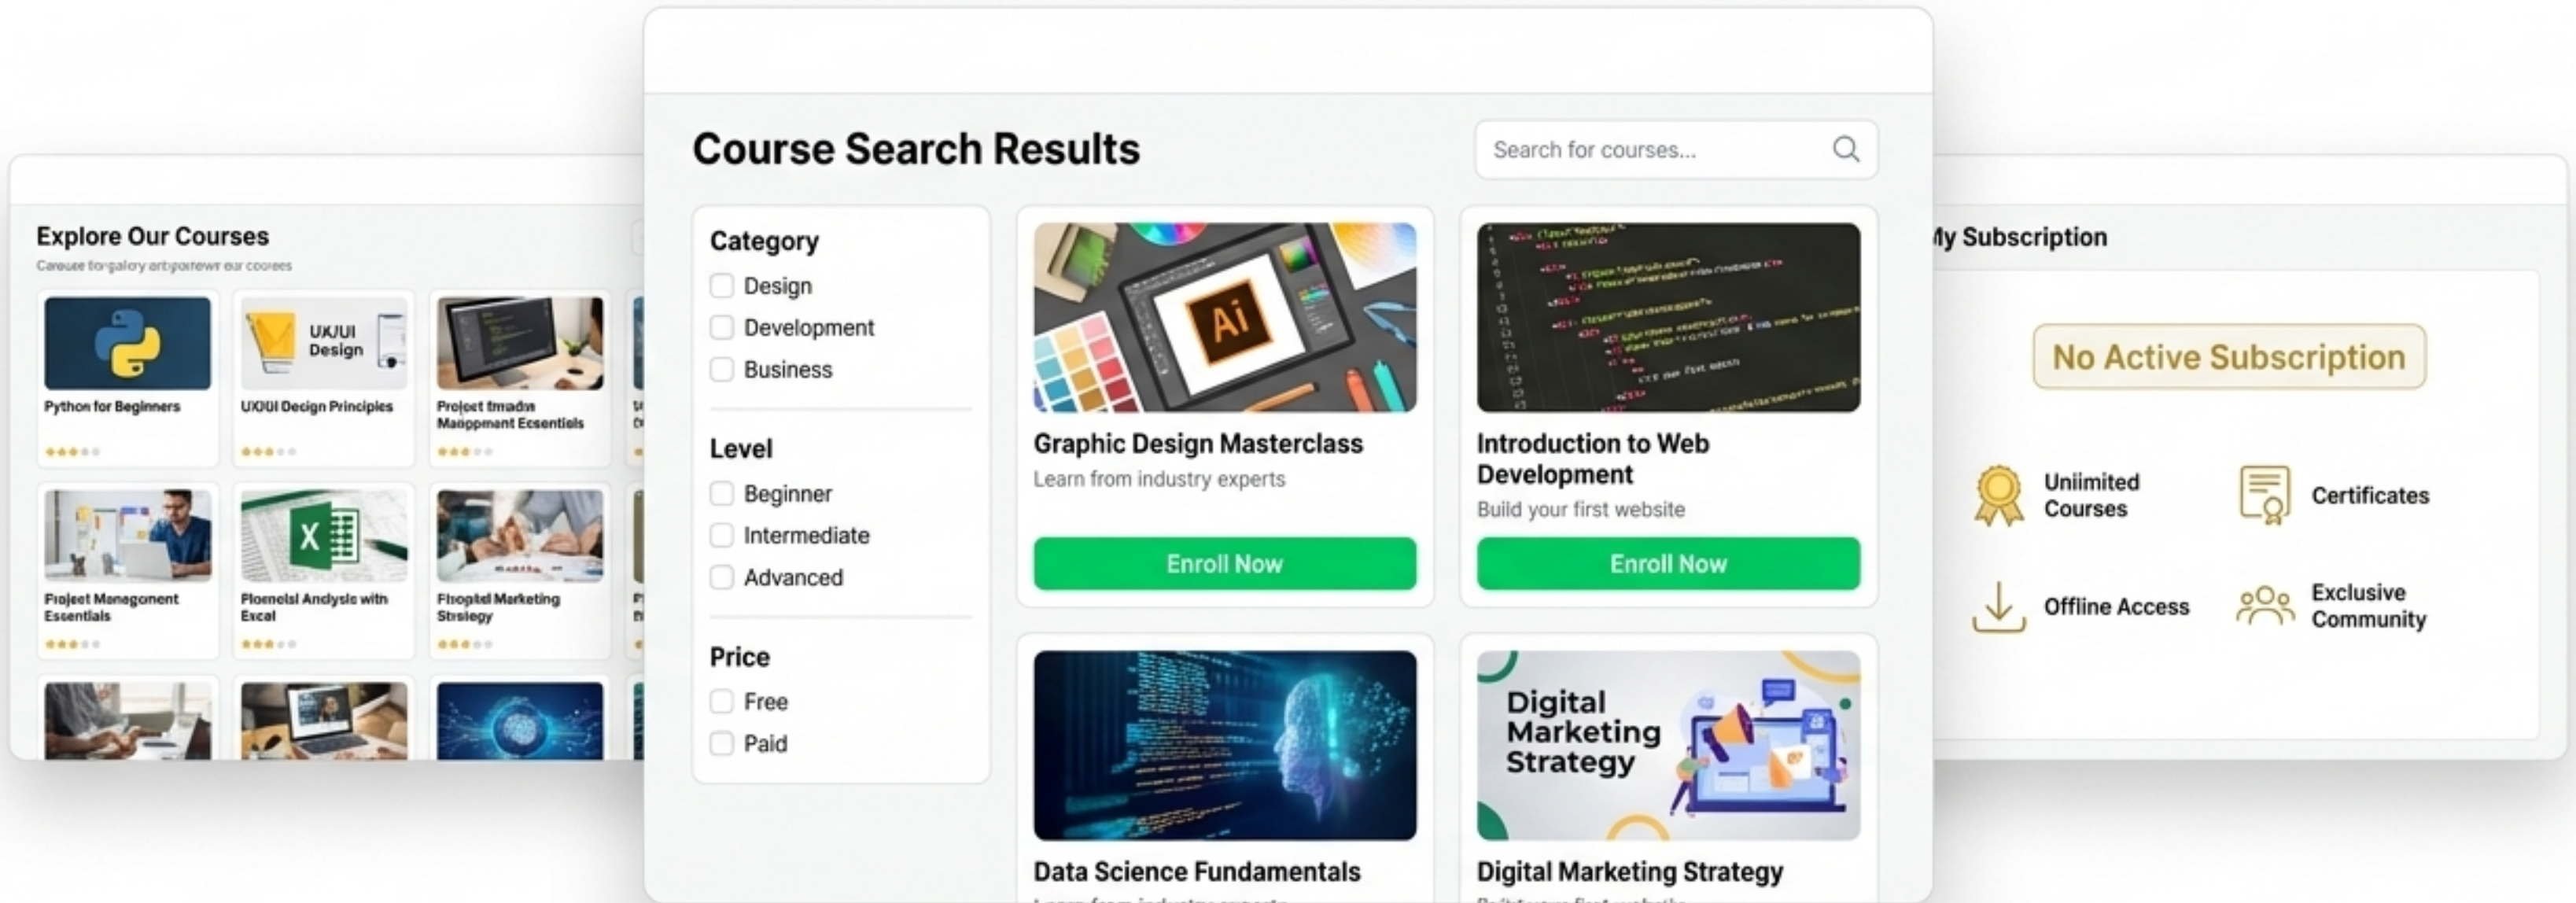

Identity Tables

Core tables for managing users, roles, and security.

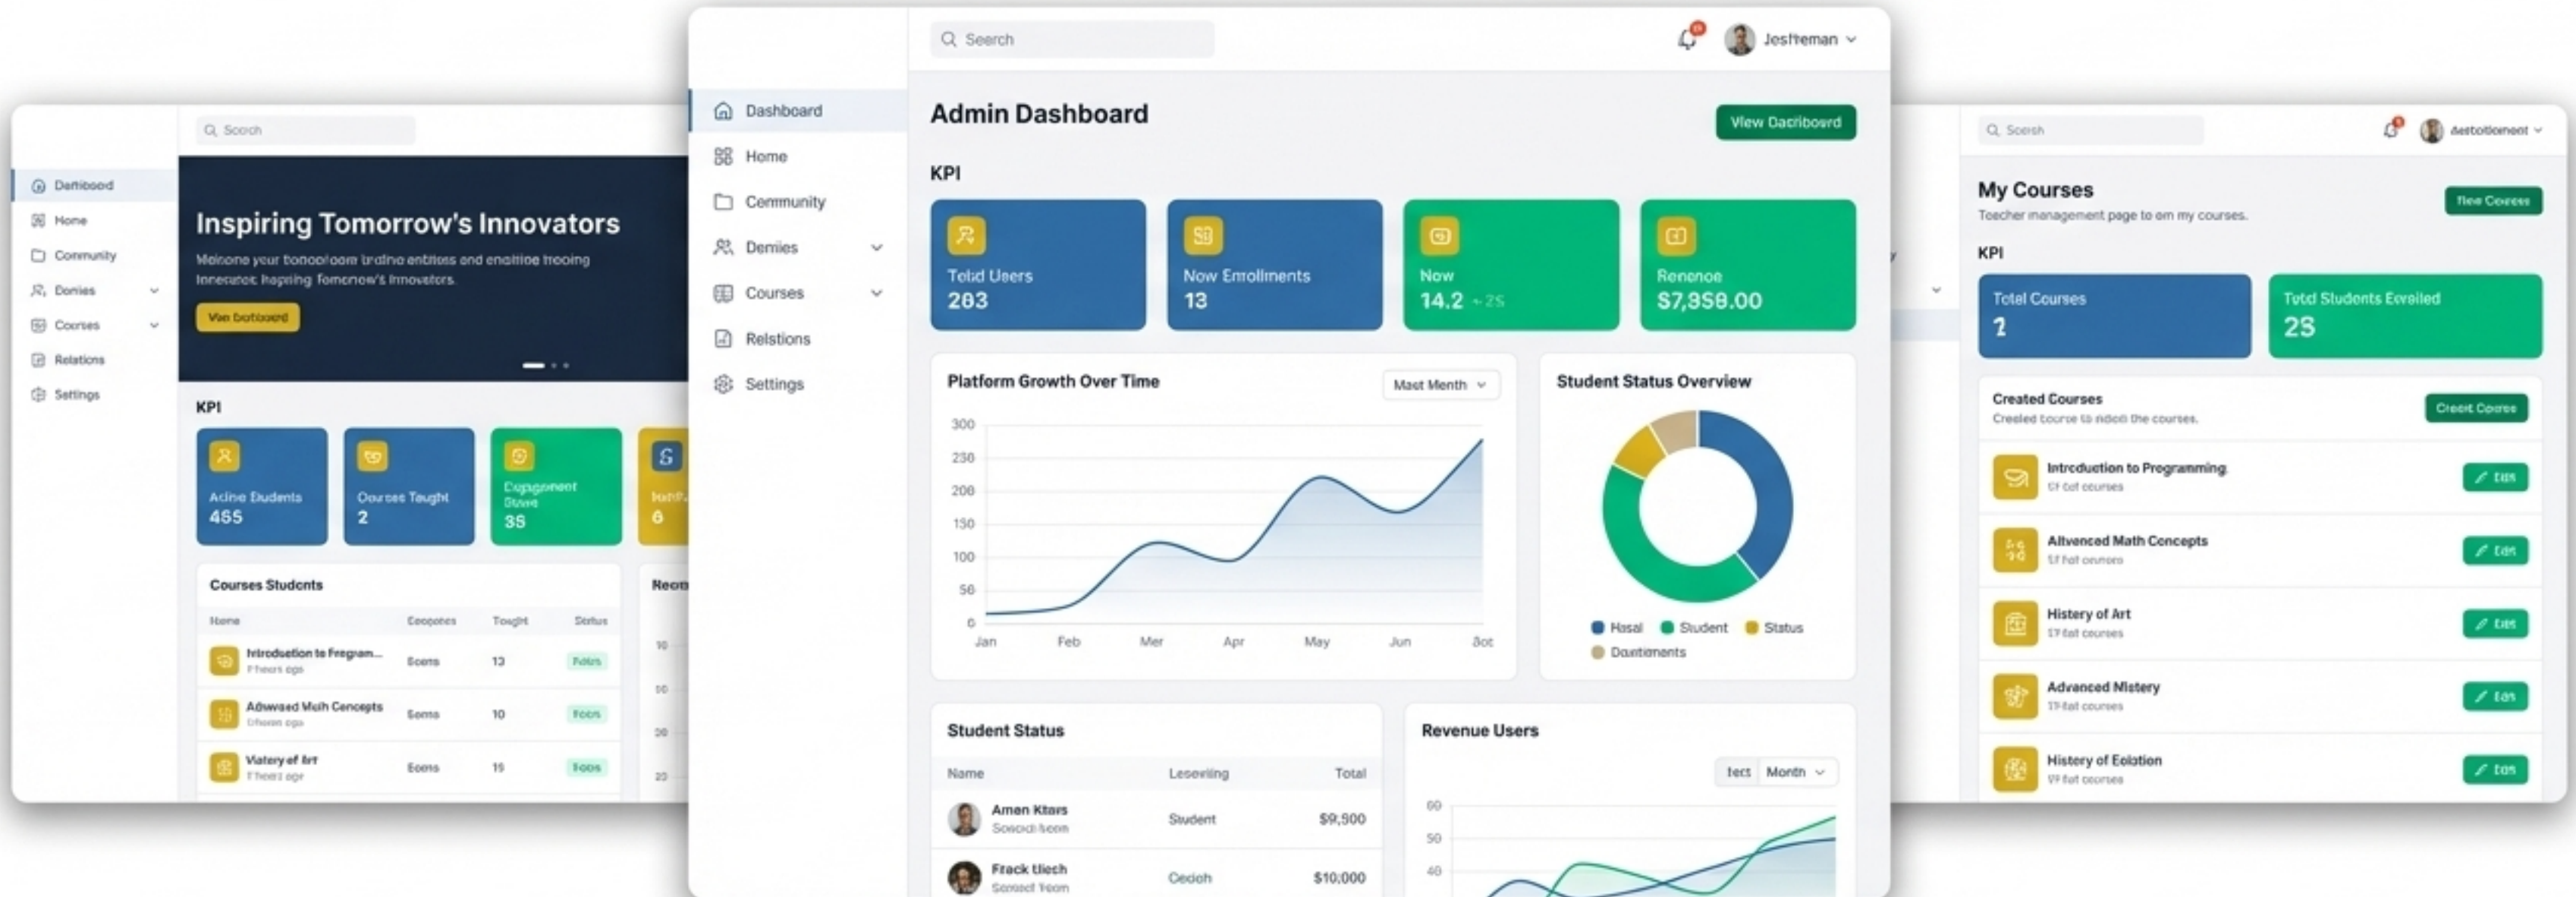

Platform in Action: A Visual Tour

The Student Experience & Course Discovery

Platform in Action: A Visual Tour

Administration & Teacher Dashboards

Platform in Action: A Visual Tour

Secure, Role-Based Onboarding

Project Success Measured: Key Performance Indicators

System Functionality Completion Rate

Goal: 100% completion of 14 core MVP features.

Layer Separation

DI Usage

100%
Adherence

Architecture Compliance Score

Strict N-Tier separation and universal Dependency Injection.

>95% Success

Testing & Reliability Rate

Pass rate across 30 main integration test cases.

0

Critical Defects

Error Rate

Goal of <1 critical bug per 50 test cases was met.

Conclusion: A Scalable & Modern E-Learning Environment

Bedaya successfully delivers a scalable, modern, and role-based e-learning environment built on sound architectural principles.

Future Enhancements

- AI-Powered Course Recommendations

- Dedicated Mobile Application

- Real-Time Analytics Dashboards
